Forensic Gait Analysis Ivan Birch, Michael Nirenberg, Wesley Vernon, Maria Birch, 2020-07-07 Gait analysis is the systematic study of human walking using the eye and brain of experienced observers augmented by instrumentation for measuring body movements body mechanics and the activity of the muscles Since Aristotle s work on gait analysis more than 2000 years ago it has become an established clinical science used extensively in the healthcare and rehabilitation fields for diagnosis and treatment Forensic Gait Analysis details the more recent and rapidly developing use of gait analysis in the forensic sciences The book considers the use of observational gait analysis based on video recordings to assist in the process of identification or exclusion With the increase in use of CCTV and surveillance systems over the last 20 to 30 years there has been a steady and rapid increase in the use of gait as evidence Currently gait analysis is widely used in the UK in criminal investigations with increasing awareness of its potential use in the US Europe and globally The book details the history of the science current practices and of the emergent application to establish best practice standards that conform to those of other forensic science disciplines Engagement with the Forensic Science Regulator and the Chartered Society of Forensic Sciences in the UK and the International Association for Identification has helped to ensure and enhance the quality assurance of forensic gait analysis However there remains a fundamental lack of standardized training and methodology for use in evidentiary and investigative casework This book fills that void serving as one of the first to describe the current state of practice capabilities and limitations and to outline methods standards of practice and expectations of the gait analyst as a forensic practitioner Forensic Gait Analysis reflects current research and forensic practice and will serve as a state of the art guide to the use of gait analysis in the forensic context for both education and training purposes It will be a welcome addition to the libraries of professionals in the areas of podiatry gait analysis forensic video analysis law enforcement and legal practice

The World's Search for Sustainable Development Mukul

Sanwal,2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings agreements and consensus within the multilateral system It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths The challenges call for a transformation of social systems to facilitate a broadly acceptable change The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices

Climate change and agriculture Dr Delphine Deryng,2020-04-28 Provides a more holistic approach by combining research both on the impacts of climate change on agriculture and the contribution of agriculture to climate change Highlights advances in ways of predicting the effects of agriculture and climate change on one another Builds on this foundation to outline key mitigation strategies to achieve a more climate smart agriculture

A Pragmatist Orientation for the Social Sciences in Climate Policy Martin Kowarsch,2016-09-01 While economic and other social science expertise is indispensable for successful public policy making regarding global climate change social scientists face trade offs between the scientific credibility policy relevance and legitimacy of their policy advice From a philosophical perspective this book systematically addresses these trade offs and other crucial challenges facing the integrated economic assessments of the Intergovernmental Panel on Climate Change IPCC Based on John Dewey s pragmatist philosophy and an analysis of the value laden nature and reliability of climate change economics the book develops a refined science policy model and specific guidelines for these assessments of climate policy options The core idea is to scientifically explore the various practical implications of alternative climate policy pathways in an interdisciplinary manner together with diverse stakeholders This could facilitate an iterative deliberative public learning process concerning disputed policy issues This volume makes novel contributions to three strands of the literature 1 the philosophy of social science in policy 2 the philosophy of economics and 3 debates about the design of scientific assessments including the continuous IPCC reform debate This work is thus interesting for philosophers and other scholars reflecting on the science policy interface but also for assessment practitioners climate policy makers and economists The science policy approach developed in this volume has already influenced the recent socio economic IPCC assessment

Market Instruments and the Protection of Natural Resources Natalie P. Stoianoff, Larry Kreiser, Bill Butcher, Janet E. Milne, Hope Ashiabor, 2016-08-26. Only through a concerted global effort can we protect our natural resources, save our precious natural environment, and indeed our future. But pressures on natural resources come from many directions, such as overuse, mismanagement, and contamination. This much-needed book reviews and evaluates the use of market and fiscal instruments in protecting our natural resources from rural to marine environments. Market instruments that are designed to protect the global atmosphere are evaluated along with carbon instruments and environmental tax incentives. Meanwhile, consideration is given to shifting the tax burden to achieve environmentally responsible outcomes, balancing sustainable use and natural resource protection, and protecting water resources.

Evaluation of Climate Change Impacts Karl W. Steininger, Martin König, Birgit Bednar-Friedl, Lukas Kranzl, Wolfgang Loibl, Franz Prettenhaler, 2015-02-26 This volume deals with the multifaceted and interdependent impacts of climate change on society from the perspective of a broad set of disciplines The main objective of the book is to assess public and private cost of climate change as far as quantifiable while taking into account the high degree of uncertainty It offers new insights for the economic assessment of a broad range of climate change impact chains at a national scale The framework presented in the book allows consistent evaluation including mutual interdependencies and macroeconomic feedback This book develops a toolbox that can be used across the many areas of climate impact and applies it to one particular country Austria

Food Security, Agricultural Policies and Economic Growth Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics, international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today's unstable global political situation **Latin America and the**

Asian Giants Riordan Roett, Guadalupe Paz, 2016-09-27 How an evolving relationship with China and India is changing Latin

America's political and economic dynamics In the years since China has adopted a going global strategy to promote its overseas investment expand export markets and gain much needed access to natural resources abroad Sino Latin American relations have both deepened and broadened at an unexpectedly rapid pace The main driver behind this sea change in bilateral relations has been economic complementarity with resource rich countries in Latin America exporting primary goods to the Asian giants growing market and China exporting manufactured goods back into the region In recent years Sino Latin American relations have matured considerably becoming far more nuanced and multifaceted than ever before India is a relatively new player in the region but has slowly strengthened its ties As one of Asia's largest markets it offers interesting parallels to the Chinese case Will Indo Latin American ties follow a similar path The main areas of growth include trade and investment mining energy information technology motor vehicle production and pharmaceuticals To what extent these changing dynamics will redefine Latin America's relations with India is a question of increasing relevance for policymakers This volume offers a review of key cross regional trends and critical policy issues involving the changing relationship between these two Asian giants and Latin America Selected country case studies Argentina Brazil Chile and Mexico provide a more in depth analysis of the implications of China's and India's evolving interaction with the region

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools
