Fire and Ice Jonathan Mingle,2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick homes has survived and thrived in one of the world s most challenging settings for a thousand years But now its people confront an existential threat chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry Fire and Ice weaves together the story of Kumik s inspiring response to this calamity with the story of black carbon Black carbon from inefficient fires the particulate residue that makes soot dark is the second largest contributor to global warming after carbon dioxide It s also a key ingredient of the air pollution that public health experts regard as humanity s greatest environmental health risk worldwide soot laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon s dark fingerprints outward from Kumik and around the world Mingle investigates its impacts on snow ice and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi Combining cultural history detailed reportage climate and energy science and dramatic storytelling Fire and Ice is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity Can Kumik s people come together to reinvent fire harness what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves Can the rest of us rise to the same challenge Fire and Ice connects these questions with the work of enterprising scientists engineers entrepreneurs and activists around the world in a narrative that combines mythology reason humor persistence and hope in a race against a global clock

The Daunting Climate Change Jayarama Reddy Puthalpet,2022-03-23 The book starts with an overview of Climate Science It discusses the signs of

Warming the impacts and consequences on several sectors terrestrial and coastal ecosystems water resources ocean systems agriculture food production and food security human health and safety livelihoods and poverty Arctic populations low lying States so on Mathematical models to project future climate and the resulting concerns global adaptation experiences and opportunities for future execution are explained The mitigation approaches chiefly decarbonizing the energy sector by developing and applying clean low carbon energy sources and improving energy efficiency and the evolving geoengineering schemes are dealt Carbon pricing an economic tool to ensure emissions reductions and transition to a low carbon economy to stimulate sustainable growth are described The continued global efforts under the UN or otherwise until the recent Paris Agreement to arrive at policy responses to tackle this intriguing but daunting problem of climate change are vividly expounded Note T F does not sell or distribute the hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Self-assessment Questions for Clinical Molecular Genetics Haiying Meng, 2019-05-28 Review Questions of Clinical Molecular Genetics presents a comprehensive study guide for the board and certificate exams presented by the American College of Medical Genetics and Genomics ACMG and the American Board of Medical Genetics and Genomics ABMGG It provides residents and fellows in genetics and genomics with over 1 000 concise questions ranging from topics in cystic fibrosis to genetic counseling to trinucleotide repeat expansion disorders It puts key points in the form of questions thus challenging the reader to retain knowledge As board and certificate exams require knowledge of new technologies and applications this book helps users meet that challenge Includes over 1 0000 multiple choice USMLE style questions to help readers prepare for specialty exams in Clinical Cytogenetics and Clinical Molecular Genetics Designed to assist clinical molecular genetic fellows genetic counselors medical genetic residents and fellows and molecular pathologist residents in preparing for their certification exam Assists trainees on how to follow guidelines and put them in practice Selected Papers from the 5th International Electronic Conference on Sensors and Applications Francisco Falcone, Stefano Mariani, Francesco Ciucci, Dirk Lehmhus, Thomas B. Messervey, Alberto Vallan, Stefan Bosse, 2020-12-29 This Special Issue comprises selected papers from the proceedings of the 5th International Electronic Conference on Sensors and Applications held on 15 30 November 2018 on sciforum net an online platform for hosting scholarly e conferences and discussion groups In this 5th edition of the electronic conference contributors were invited to provide papers and presentations from the field of sensors and applications at large resulting in a wide variety of excellent submissions and topic areas Papers which attracted the most interest on the web or that provided a particularly innovative contribution were selected for publication in this collection These peer reviewed papers are published with the aim of rapid and wide dissemination of research results developments and applications We hope this conference series will grow rapidly in the future and become recognized as a new way and venue by which to electronically present new developments related to the field of sensors and their applications

Carbon Governance, Climate Change and Business Transformation Adam Bumpus, James Tansey, Blas Luis Pérez

Henríquez,Chukwumerije Okereke,2014-07-17 Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security Despite advances in policy carbon management and continuing development of clean technology fundamental business transformation has not occurred because of multiple political economic social and organisational issues Carbon Governance Climate Change and Business Transformation is based on leading academic and industry input and three international workshops focused on low carbon transformation in leading climate policy jurisdictions Canada USA and the UK under the international Carbon Governance Project CGP banner The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change the conditions under which business transformation can genuinely take place and key policy and business innovations needed Broadly the book is based on emerging theories of multi levelled multi actor carbon governance and applies these ideas to the real world implications for tackling climate change through business transformation Conceptually and empirically this book stimulates both academic discussion and practical business models for low carbon transformation

Sustainable Cities Kimberly Etingoff,2017-03-16 This title includes a number of Open Access chapters Two trends come together in the world s cities to make urban sustainability a critical issue today First greater and greater numbers of people are living in urban areas and are projected to do so for the foreseeable future Additionally cities contribute to climate change in a significant way and must make systemic changes to mitigate and adapt to climate change effects Urban planners face serious challenges in enhancing sustainability but also have an important set of tools available for creating innovative solutions This book adds to the conversation about the place of urban planning in the creation and maintenance of sustainable cities

The United States of Excess Robert Paarlberg,2015-03-02 Is it possible that America is hard wired to consume too much food and fuel Unfortunately yes says Robert Paarlberg in The United States of Excess America s excess is driven in each case by its distinct endowment of material and demographic resources its unusually weak national political institutions and a unique political culture that celebrates both individual freedoms over social responsibility and free markets over governmental authority America s over consumption is shown to be over determined

Common Wealth Dividends Brent Ranalli,2021-04-22 Common wealth dividends are universal cash payments funded by fees on the private use of common resources like land minerals and the atmosphere as a carbon sink Thomas Paine s 1797 pamphlet Agrarian Justice and Alaska s Permanent Fund Dividend are staples in the literature on Basic Income but there is much more to common wealth dividends beyond these highlights and common wealth dividends have a distinctive ethical justification and distinctive policy implications that merit discussion This monograph the most comprehensive study of common wealth dividends to date will be of interest to students teachers and advocates of Basic Income and those in the field of environmental studies including sustainable development natural resource management and climate policy

Arctic Ice

Shelves and Ice Islands Luke Copland, Derek Mueller, 2017-05-30 This book provides an overview of the current state of knowledge of Arctic ice shelves ice islands and related features Ice shelves are permanent areas of ice which float on the ocean surface while attached to the coast and typically occur in very cold environments where perennial sea ice builds up to great thickness and or where glaciers flow off the land and are preserved on the ocean surface These landscape features are relatively poorly studied in the Arctic yet they are potentially highly sensitive indicators of climate change because they respond to changes in atmospheric oceanic and glaciological conditions Recent fracturing and breakup events of ice shelves in the Canadian High Arctic have attracted significant scientific and public attention and produced large ice islands which may pose a risk to Arctic shipping and offshore infrastructure Much has been published about Antarctic ice shelves but to date there has not been a dedicated book about Arctic ice shelves or ice islands This book fills that gap

China's Way to Carbon Emissions Reduction Ying Shen, 2015-08-18 Now that the most recent scientific estimates have shown that China has become the world's largest source of greenhouse gas emissions China's influence on the world's environment and sustainable development highlights the importance of tailoring Chinese climate change law to conform with the requirements of international conventions and agreements on climate change This thorough analysis based on an examination of climate status legal background and current regulatory systems in China examines the potential role of different policy instruments in reducing carbon emissions in order to find an appropriate choice for China and recommends approaches to key issues for relevant authorities The author conducts a comprehensive and in depth study on the three mainstream environmental policy instruments used to control carbon emissions the cap and trade system the carbon tax and command and control regulations in a Chinese context She reviews China's current policies and elucidates how the issues of climate change and global warming call for social environmental economic and legal reforms in China especially in the areas of administrative law and property rights law Among the issues and topics covered are the following key issues on designing and implementing each of the three policy instruments the choice of regulatory instruments for carbon emissions reduction in a socialist market economy based on the discussion of market failure and government failure theories legal challenges from China's current administrative legislation and the definition of carbon emissions entitlements practical effect of China's climate change policy at the national provincial and local levels effectiveness of China's implementation of its international obligations lessons learned from schemes implemented in the United States and Australia comparison of China's seven regional pilot emissions trading scheme ETS programmes with the well established EU ETS linkage between China's ETS and other ETSs from a global perspective and future direction of an emerging carbon market in China The analysis assesses the critical costs and benefits of each approach in the context of selected case studies taking legal literature in the field fully into account Given that the Chinese government is taking steps to reduce emissions by altering energy production and usage and is signalling a willingness to make similar commitments in a multilateral treaty it is very timely and important for lawmakers and scholars

within and outside China to think about new and appropriate regulatory measures to respond to the crisis and plan for a sustainable future This study provides not only a useful benchmark for both China and other countries in formulating initiatives on enhancing climate protection but also details the global implications for governments and for international organizations concerned with the understanding between China and the rest of the world in the context of climate change mitigation

Introduction to Rural Planning Nick Gallent, Iqbal Hamiduddin, Meri Juntti, Sue Kidd, Dave Shaw, 2015-06-30

Introduction to Rural Planning Economies Communities and Landscapes provides a critical analysis of the key challenges facing rural places and the ways that public policy and community action shape rural spaces The second edition provides an examination of the composite nature of rural planning which combines land use and spatial planning elements with community action countryside management and the projects and programmes of national and supra national agencies and organisations It also offers a broad analysis of entrepreneurial social action as a shaper of rural outcomes with particular coverage of the localism agenda and Neighbourhood Planning in England With a focus on accessibility and rural transport provision this book examines the governance arrangements needed to deliver integrated solutions spanning urban and rural places Through an examination of the ecosystem approach to environmental planning it links the procurement of ecosystem services to the global challenges of habitat degradation and loss climate change and resource scarcity and management A valuable resource for students of planning rural development and rural geography

Introduction to Rural Planning aims to make sense of current rural challenges and planning approaches evaluating the currency of the rural label in the context of global urbanisation arguing that rural spaces are relational spaces characterised by critical production and consumption tensions
