***Myotonic Dystrophy*** Masanori P. Takahashi, Tsuyoshi Matsumura, 2018-10-31. This book provides an essential overview combining both clinical and fundamental research advances in myotonic dystrophy. The pathomechanism of myotonic dystrophy has long been unclear, but in the past decade our understanding has shifted to a novel disease mechanism concept: RNA disease. Parallel to these advances in elucidating the pathophysiology, translational research is also progressing rapidly. The current challenge lies in assessing the effectiveness of treatment, and as such there is a growing interest in observational studies of the disease's various clinical symptoms. The book introduces readers to the molecular mechanisms within each organ and the resultant clinical features, which are presented together. In particular, it focuses on the central nervous system, since the pathology of the brain, central nervous system manifestation, has rarely been addressed systematically and will pose a persistent challenge even if therapies have greatly advanced in the future. In addition, the book addresses the latest developments, such as research using patient-derived iPSC cells and therapeutic research. *Myotonic Dystrophy* provides essential information for neurologists and researchers with an interest in muscle disease, including muscular dystrophy. Furthermore, since the disease involves various complications of the brain, heart, metabolism, etc., the book will be of great value to clinicians and researchers in the cardiovascular sciences, endocrinology, diabetes, dementia, and neuropsychology, as well as genetic specialists.

***Haploidentical Stem Cell Transplantation*** Taner Demirer, 2017-10-27. This book discusses the aspects of haploidentical transplants and will shed light on the debates and questions on this burgeoning field and timely topic. Donor selection, graft failure, minimal CD34 cell requirement, and conditioning regimens used for haploidentical transplants will be written by expert authors dealing with this type of transplants. Approximately one-third of the book's chapters cover logic and basic aspects; the remaining two-thirds of the book discuss clinical aspects, outcomes, and future perspectives, thus providing a comprehensive discussion of the topic. Haploidentical transplantation is an extremely timely, rapidly changing area, and increasing its use will decrease the need for time-consuming, expensive, unrelated donor search. Moreover, Haploidentical Stem Cell Transplantation brings a set of clear answers to questions of feasibility, advantages over unrelated transplants, cost-effectivity, and outcome.

**Postmodern Gandhi and Other Essays** Lloyd I. Rudolph, Susanne Hoeber Rudolph, 2010-07-15. Gandhi with his loincloth and walking

stick seems an unlikely advocate of postmodernism But in Postmodern Gandhi Lloyd and Susanne Rudolph portray him as just that in eight thought provoking essays that aim to correct the common association of Gandhi with traditionalism Combining core sections of their influential book Gandhi The Traditional Roots of Charisma with substantial new material the Rudolphs reveal here that Gandhi was able to revitalize tradition while simultaneously breaking with some of its entrenched values and practices Exploring his influence both in India and abroad they tell the story of how in London the young activist was shaped by the antimodern other West of Ruskin Tolstoy and Thoreau and how a generation later a mature Gandhi s thought and action challenged modernity s hegemony Moreover the Rudolphs argue that Gandhi s critique of modern civilization in his 1909 book Hind Swaraj was an opening salvo of the postmodern era and that his theory and practice of nonviolent collective action satyagraha articulate and exemplify a postmodern understanding of situational truth This radical interpretation of Gandhi s life will appeal to anyone who wants to understand Gandhi s relevance in this century as well as students and scholars of politics history charismatic leadership and postcolonialism
