Seven Flowers And How They Shaped Our World:

Seven Flowers Jennifer Potter, 2013-10-03 SHORTLISTED FOR THE GARDEN MEDIA AWARDS INSPIRATIONAL BOOK OF THE YEAR The lotus lily sunflower opium poppy rose tulip and orchid Seven flowers seven stories full of surprise and secrets Where and when did these flowers originate What is the nature of their power and how was it acquired What use has been made of them in gardens literature and art These are both histories and detective stories full of incident unexpected revelations and irony The opium poppy for example returned to haunt its progenitors in the West and while Confucius saw virtue and modesty in his native orchids the ancient Greeks saw only sex These are flowers of life and death of purity and passion of greed envy and virtue of hope and consolation of the beauty that drives men wild All seven demonstrate the enduring ability of flowers to speak metaphorically if we could only decode what they have to say **The Ugly History of Beautiful Things** Katy Kelleher, 2024-04-23 Paris Review columnist Katy Kelleher explores our obsession with gorgeous things unveiling the fraught histories of makeup flowers perfume silk and other beautiful objects The Hidden Language of Symbols Matthew Wilson, 2022-11-03 Why do we reach for the red rose on Valentines day Where did the owl gain its reputation for wisdom Why should you never trust a fox In this visual tour through art history Matthew Wilson pieces together a global visual language enshrined in art the language of symbols Symbols exert a strong hold in the image saturated 21st century and have done so for thousands of years From national emblems to corporate logos and emojis our day to day lives abound with icons with roots in the distant past Expert art historian Matthew Wilson traces the often surprising trajectories that symbols have taken through history from their original purposes to their modern meanings identifying the common themes and ideas that link seemingly disparate cultures Thus we meet the falcon as a symbol of authority from the ancient Egyptian pharaohs to the medieval aristocracy the dog as stalwart companion from the classical era to the Renaissance and the mythical phoenix as a symbol of female power connecting a queen in England with a goddess in China We also see moments of radical reinterpretation and change the transformation of the swastika from an auspicious symbol of hope to one of hate From Palaeolithic cave paintings to contemporary installations Wilson deftly guides us through this world of symbols showcasing their enduring ability to express power hope fear and faith and to create and communicate identities uniting or dividing the people that made them *Toni Morrison and the Natural World* Anissa Janine Wardi, 2021-06-28 Winner of the Toni Morrison Society Book Prize for Best Single Authored Book 2019 2022 Critics have routinely excluded African American literature from ecocritical inquiry despite the fact that the literary tradition has from its inception proved to be steeped in environmental concerns that address elements of the natural world and relate nature to the transatlantic slave trade plantation labor and nationhood Toni Morrison s work is no exception Toni Morrison and the Natural World An Ecology of Color is the first full length ecocritical investigation of the Nobel Laureate s novels and brings to the fore an unequalled engagement between race and nature Morrison s ecological consciousness holds that human geographies

are enmeshed with nonhuman nature It follows then that ecology the branch of biology that studies how people relate to each other and their environment is an apt framework for this book The interrelationships and interactions between individuals and community and between organisms and the biosphere are central to this analysis They highlight that the human and nonhuman are part of a larger ecosystem of interfacing and transformations Toni Morrison and the Natural World is organized by color examining soil brown in The Bluest Eye and Paradise plant life green in Song of Solomon Beloved and Home bodies of water blue in Tar Baby and Love and fire orange in Sula and God Help the Child By providing a racially inflected reading of nature Toni Morrison and the Natural World makes an important contribution to the field of environmental studies and provides a landmark for Morrison scholarship

Botanical Architecture Paul

Dobraszczyk,2024-11-12 An original call to reorient architecture around our relationship to plants When we look at trees we see a form of natural architecture and yet we have seemingly always exploited trees to make new buildings of our own Whereas a tree creates its own structure humans generally destroy other things to build with increasingly disastrous consequences In *Botanical Architecture* Paul Dobraszczyk looks closely at how elements of plants seeds roots trunks branches leaves flowers and canopies compare with and constitute human made buildings Given the omnipresence of plant life in and around our structures Dobraszczyk argues that we ought to build as much for plants as for ourselves understanding that our lives are always totally dependent on theirs *Botanical Architecture* offers a provocative and original take on the relationship between ecology and architecture
