## **Sharing Our Worlds An Introduction To Cultural And Social Anthropology:**

An Introduction to Social Anthropology Joy Hendry, 2017-09-16 An essential core textbook that leads the reader from Social Anthropology's foundational approaches and theories to the fundamental areas that characterise the field today. Taking a truly global and holistic view, it includes a wide range of case studies touching on topics that both divide and connect us, such as family, marriage and religion. Fully updated and revised, the third edition of this popular textbook continues to introduce students to what Social Anthropology is, what anthropologists do, how and what they contribute, and how even a limited knowledge of anthropology can help people flourish in today's world. This is an inviting, engaging and enjoyable text that has established itself as a comprehensive introduction to social and cultural anthropology. Written in an accessible style and including a wide range of pedagogical features, it is ideally suited to new or prospective students seeking to better understand the discipline and its roots. New to this Edition: Includes a new chapter on the role of social and cultural anthropologists and the specific methods they use in a fast-changing world. Features a number of new first-hand accounts to explore difficult concepts through people's real-world experiences. Updated sections for further exploration, including books, articles, novels, films and websites.

Sharing Our Worlds Joy Hendry, 2008-04 Women today are being instructed on how they can raise their self-esteem, love their inner child, survive their toxic families, overcome codependency and experience a revolution from within. By holding up the ideal of a pure and happy inner core, psychotherapists refuse to acknowledge that a certain degree of unhappiness or dissatisfaction is a routine part of life and not necessarily a cause for therapy. Lesbians specifically are now guided to define themselves according to their frailties, inadequacies and insecurities. An incisive critique of contemporary feminist psychology and therapy, *Changing our Minds* argues not just that the current practice of psychology is flawed, but that the whole idea of psychology runs counter to many tenets of lesbian feminist politics. Recognizing that many lesbians do feel unhappy and experience a range of problems that detract from their well-being, *Changing Our Minds* makes positive prescriptive suggestions for non-psychological ways of understanding and dealing with emotional distress. Written in a lively and engaging style, *Changing our Minds* is required reading for anyone who has ever been in therapy or is close to someone who has, and for lesbians, feminists, psychologists, psychotherapists, students of psychology and women's studies, and anyone with an interest in the development of lesbian feminist theory, ethics and practice.

**Rethinking Oral History and Tradition** Nepia Mahuika, 2019-10-09 Indigenous peoples have our own ways of defining oral history For many oral sources are shaped and disseminated in multiple forms that are more culturally textured than just standard interview recordings For others indigenous oral histories are not merely fanciful or puerile myths or traditions but are viable and valid historical accounts that are crucial to native identities and the relationships between individual and collective narratives This book challenges popular definitions of oral history that have displaced and confined indigenous oral accounts as merely oral tradition It stands alongside other marginalized community voices that highlight the importance of feminist Black and gay oral history perspectives and is the first text dedicated to a specific indigenous articulation of the field Drawing on a Maori indigenous case study set in Aotearoa New Zealand this book advocates a rethinking of the discipline encouraging a broader conception of the way we do oral history how we might define its form and how its politics might move beyond a subsuming democratization to include nuanced decolonial possibilities

Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method A wealth of alternative approaches exists but they tend to be discussed in isolation from one another This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field As such it provides a coherent accessible and diverse account of key theories and methods A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study of our discipline
