*Television* Alexander B. Magoun, 2007-06-30 For better or worse television has been the dominant medium of communication for 50 years Almost all American households have a television set many have more than one Transmitting images and sounds electronically is a relatively recent invention one that required passionate inventors determined businessmen government regulators and willing consumers This volume

in the Greenwood Technographies series covers the entire history of television from 19th century European conceptions of transmitting moving images electrically to the death of TV as a discrete system in a digital age Magoun also discusses the changing face of television in the displays that people watch around the globe Television The Life Story of a Technology appeals to students and lay readers alike in highlighting key events and people the American engineers and entrepreneurs such as Vladimir Zworykin and David Sarnoff who ignited the television industry the bloom of programming choices in tandem with the Baby Boom generation the development of cable and satellite TV the Asians who innovated American inventions in videorecording and flat panel displays the use of TV in wartime and the new worlds of digital and high definition television Based on the latest research this crisply written sometimes provocative survey includes a glossary timeline and bibliography for further information

**Liquid Crystal Flat Panel Displays** William C. O'Mara, 2013-11-11 We live in the silicon age and the quintessential item that defines our world is the computer Silicon chips power the computer as well as many other products for work and leisure such as calculators radios and televisions In the forty years since the transistor was invented the solid state revolution has affected the lives of almost everyone in the world Based on silicon solid state devices and integrated circuits have revolutionized electronics data processing communications and the like The computer especially the personal computer would be impossible without silicon devices Only one computer was ever built using vacuum tubes and the tubes had to be constantly replaced because they generated too much heat and burned out Silicon devices allowed for reliable switching operations in arrays of hundreds and thousands of discrete devices As a result the very substantial industrial base that existed for producing vacuum tubes disappeared with one exception That exception is of course the CRT which is evident in televisions computer displays and a host of other information display terminals Until recently there was nothing that could take its place and it seemed that the CRT would remain as the electronic medium for all except the simplest displays The CRT is about to go the way of the other vacuum tubes It's dead but doesn't know it yet **HWM**, 2003-09 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews
