Statement of Disbursements of the House as Compiled by the Chief Administrative Officer from ... United States. Congress. House, 2013 Covers receipts and expenditures of appropriations and other funds **Chronicity Enquiries: Making Sense of Chronic Illness** Li Zhenyi, Sara Rieder Bennett, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 Chronic illness together with people experiencing or treating it became almost mute to predominant biomedical narration pervasive in mainstream media education medical and pharmaceutical industry Contributors in this book aim to represent discuss and preserve the vanishing voices and stories on chronic illness from dimensions beyond medicine so that we may make sense of chronicity with the diversity it deserves The book also incorporates research articles which share important stories about chronicity These stories same as chronic illness in our world should not be treated in a standardised way Each reader we hope will relate the meanings of chronicity in this book to his or her own world Rethinking Diabetes Emily Mendenhall, 2019-07-15 In Rethinking Diabetes Emily Mendenhall investigates how global and local factors transform how diabetes is perceived experienced and embodied from place to place Mendenhall argues that the link between sugar and diabetes overshadows the ways in which underlying biological processes linking hunger oppression trauma unbridled stress and chronic mental distress produce diabetes The life history narratives in the book show how deeply embedded these factors are in the ways diabetes is experienced and re produced among poor communities around the world Rethinking Diabetes focuses on the stories of women living with diabetes near or below the poverty line in urban settings in the United States India South Africa and Kenya Mendenhall shows how women s experiences of living with diabetes cannot be dissociated from their social responsibilities of caregiving demanding family roles expectations and gendered experiences of violence that often displace their ability to care for themselves first These case studies reveal the ways in which a global story of diabetes overlooks the unique social political and cultural factors that produce syndemic diabetes differently across contexts From the case studies Rethinking Diabetes clearly provides some important parallels for scholars to consider significant social and economic inequalities health systems that are a mix of public and private with substandard provisions for low income patients and rising diabetes incidence and prevalence At the same time Mendenhall asks us to unpack how social cultural and epidemiological factors shape people s experiences and why we need to take these differences seriously when we think about what drives diabetes and how it affects the lives of the poor

Investigation of Un-American Propaganda Activities in the United States United States. Congress. House. Special Committee on Un-American Activities (1938-1944), 1938 Let Me Heal Kenneth M. Ludmerer, 2015 In Let Me Heal prize winning author Kenneth M Ludmerer provides the first ever account of the residency system for training doctors in the United States and by tracing its evolution explores how the residency system is of fundamental importance to the health of the nation In the making of a doctor the residency system represents the dominant formative influence It is during the three

to nine years spent in residency that doctors come of professional age acquiring the knowledge and skills of their specialty or subspecialty forming a professional identity and developing habits behaviors attitudes and values that last a professional lifetime Let Me Heal examines all dimensions of the residency system historical evolution educational principles moral underpinnings financing and administration and cultural components It focuses on the experience of being a resident on how that experience has changed over time and on how well the residency system is fulfilling its obligation to produce outstanding doctors Most importantly it analyzes the mutual relationship between residency education and patient care in America The book shows that the quality of residency training ultimately depends on the quality of patient care that residents observe but that there is much that residency training can do to produce doctors who practice in a better more affordable fashion

Biomedicalization and the Practice of Culture Mari Armstrong-Hough, 2018-11-12 Over the last twenty years type 2 diabetes skyrocketed to the forefront of global public health concern In this book Mari Armstrong Hough examines the rise in and response to the disease in two societies the United States and Japan Both societies have faced rising rates of diabetes but their social and biomedical responses to its ascendance have diverged To explain the emergence of these distinctive strategies Armstrong Hough argues that physicians act not only on increasingly globalized professional standards but also on local knowledge explanatory models and cultural toolkits As a result strategies for clinical management diverge sharply from one country to another Armstrong Hough demonstrates how distinctive practices endure in the midst of intensifying biomedicalization both on the part of patients and on the part of physicians and how these differences grow from broader cultural narratives about diabetes in each setting
