Role Of Ict In Governance:

What Kind of Information Society? Governance, Virtuality, Surveillance, Sustainability, Resilience Jacques J. Berleur, Magda David Hercheui, Lorenz M. Hilty, 2010-08-06 The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane Australia September 20-23 organised by the International Federation for Information Processing IFIP In the first part the reader can find the proceedings of the 9th Human Choice and Computers International Conference HCC9 organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society The HCC9 part is subdivided into four tracks Ethics and ICT Governance Virtual Technologies and Social Shaping Surveillance and Privacy and ICT and Sustainable Development The second part consists of papers given at the Critical Information Infrastructure Protection Conference CIP organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems The two parts of the book are introduced by the respective Conference Chairs Chapter 1 introduces HCC9 providing a short summary of the HCC conference series which started in 1974 and explaining the overview of HCC9 detailing the rationale behind each of the tracks in this conference The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 Chaps 2-10-16 and 22 Finally Chap 22 introduces the CIP part ICT, Public Administration and Democracy in the Coming Decade A.J. Meijer, F. Bannister, M. Thaens, 2013-06-20 The physicist Neils Bohr allegedly wrote that Prediction is very difficult especially about the future Many academics believe that serious scholars should never attempt to write about the future but some awareness of the ways in which the future of e government may evolve is needed if well grounded long term decisions about issues such as infrastructures institutions and educational programs are to be made In addition future oriented research is of the utmost importance for informed public debate about technological developments with far reaching societal implications This book marks the 25th anniversary of the permanent study group on e government of the European Group for Public Administration and the papers here were first presented at their 2012 meeting in Bucharest Romania The invited authors were not asked for rigorous analyses based on systematic empirical research or deeply rooted in a theoretical framework instead they were challenged to write thoughtful and measured but provocative essays about ICT and public administration in the coming decade Their contributions are reflections on the nature of new and emerging technologies in the public sector and their impact on government and on democracy itself The book is divided into three sections the past and present as starting point for thinking about the future of e government imagining the future of government and implications for research and practice The many questions raised by developments in ICT for future public administration are presented in a clear and thought provoking manner and merit more debate This volume represents a departure from the normal run of academic publications It is intended both to provoke academics and administrators to think about questions which will affect all of our futures and to offer a range of creative ideas about how the opportunities presented by technology

can be exploited to provide better government and governance Professionalism in the Information and Communication Technology Industry John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others It is vital in some because of the life and death decisions that must be made for example in medicine In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation The core idea behind this book is that Information and Communication Technology ICT is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind **Encyclopedia of Digital Government** Anttiroiko, Ari-Veikko, Malkia, Matti, 2006-07-31 Containing more than 250 articles this three volume set provides a broad basis for understanding issues theories and applications faced by public administrations and public organizations as they strive for more effective government through the use of emerging technologies This publication is an essential reference tool for academic public and private libraries **Electronic Government** Hans Jochen Scholl, Marijn Janssen, Maria A. Wimmer, Carl Eric Moe, Leif Skiftenes Flak, 2012-08-16 This book constitutes the refereed proceedings of the 11th IFIP WG 8.5 International Conference EGOV 2012 held in Delft The Netherlands in September 2012 The 23 revised full papers presented were carefully reviewed and selected from more than 80 submissions The papers are organized in topical sections on foundations adoption and diffusion open government and transformation infrastructure and technology evaluation and citizen perspective social inclusion and social media *Information and communications technology in government* Great Britain: National Audit Office, 2011-02-17 This report reviews how government uses Information and Communications Technology ICT to deliver public services The review gives an overview of existing uses as well as initiatives and changes underway It details a number of big challenges the government faces in protecting and improving the value for money of ICT and in ensuring that ICT is deployed fully in the drive to secure sustainable cost reduction In response to such challenges and a worsening financial situation the government has made a number of changes prominent among which was the formation in June 2010 of the Efficiency and Reform Group that is taking a new approach to securing value for money from ICT The Group has been responsible for a number of new initiatives including the moratorium on central government's signing new ICT contracts worth more than 1 million without agreement from the Minister for the Cabinet Office a mandatory review of all ICT projects currently underway to identify waste and a drive to renegotiate contracts with suppliers Most of the Group's initiatives are at a very early stage and it is too early for the National Audit Office to evaluate their effect This review will however set the ground for future evaluations of these and other initiatives designed to achieve value for money from ICT spending **Information and Communication Technology for Sustainable Development** Cesar Marolla, 2018-11-13 Information and Communication Technology for Sustainable Development shows how ICT as an enabler for all spheres of development can help innovate business processes and operations and provide faster integration of new technologies into business

systems Focused on sustainability the book addresses strategic approaches to cope with a range of climatic environmental cyber security threats and other global risks and aims to promote prosperity and economic growth Furthermore it explores how the adoption of new technologies and collective action based upon a strategic behavioral theory of new leadership can be applied when responding to specific set of conditions that allow for the proposed strategies to cope with risks Information technology and strategic planning complement each other to attain the sustainable development goals SDGs Risk management frameworks business continuity systems and strategic planning methodologies such as mechanism design theory strategic adaptive cognition SAC and risk mechanism theory RMT are the fundamental components needed to have a universal approach embedded into the national development plans agenda As technology no longer follows an orderly linear path but improves exponentially developing a strategic approach to ICT implementation help world leaders in the difficult but inspiring task of making a sustainable world and consequently find solutions to achieve the SDGs and the desired growth pattern that must be sustained inclusive and equitable Features Discusses for the first time the potential of ICT as a transformative power in finding solutions to climatic and economic issues Illustrates comprehensive strategic planning for leaders to implement in both public and private organizations Integrates standards and frameworks in the context of sustainable development along with the UN Sustainable Development Goals Describes in detail how mechanism design risk management business continuity systems a comprehensive strategic planning using SAC Strategic Adaptive Cognition and risk mechanism theory can be used to address environmental risks and attain sustainable development goals SDGs Explains eHealth as an adaptation strategy to address future changes in climate and impacts and the links between mitigation and adaptation to ICTs
