

HOW TO SET THE TIME ON AN ANALOG WATCH

Gently pull the crown out as far as it will go. The watch will spring when the crown is in the "up" position. If the crown has a "screw-down locking device," you may have to "unlock" it before you can pull the crown out to its full extent. Rotate the crown counter-clockwise toward the bottom of the watch. (The minute hand will rotate gently, pull the crown out as far as it will go.)

Now, rotate the crown clockwise toward the top of the watch as the hands advance past the 12 o'clock position. If the day/date changes you are in the first position. If the day/date does not change you are in the 15th position. Proceed to set the correct time and push the crown all the way back in. Make sure hand is set the time and date in the date for correct day/date setting.

HOW TO SET THE DAY/DATE ON AN ANALOG WATCH

To set the day/date on an analog watch, gently pull the crown out to the first click position.

Rotate the crown clockwise toward the top of the watch face. This date on the watch will advance. If the number showing in the window is too high, go past "12" and the number will start at "1" again.

If your watch also displays a day/date window, set this by rotating the crown counter-clockwise toward the bottom of the watch face. The day/date window will advance. When you finish, push the crown all the way back in. If necessary, stop one day before the correct day/date is set.

Now, pull the crown out another step and turn it clockwise as the hands move forward. When you pass 12, the day and date should change automatically to the correct date. If you are setting the month, rotate again, and as soon as you get to the correct time and push the crown all the way back in. If you are setting the month after noon, go past 12 again. Before you stop at the correct time and push the crown all the way back in, if the watch is a "screw-down locking crown," rotate the crown after setting the correct time by pushing down on the crown as you turn it clockwise.

CHRONOGRAPHS

A table chronograph is not only a watch, it is also a sophisticated instrument that lets measure time in fractions of a second and includes features such as:

- elapsed time,
- accumulated time, which allows you to track playing time, and stop the clock during timeouts,
- split-time measurement, which allows you to make adjustments of time for laps or legs of a race or to time two different events.

USING ANALOG CHRONOGRAPH FUNCTIONS

The chronograph functions are operated by pressing the buttons on the side of the case.

1. **START/STOP/TIME**
To measure time from 0 to 60 seconds, push button A to the start position. To stop and clear the chronograph, push button B to the center, and use button B to reset.
