Method 1: Diagrams and Equations Draw a free-body diagram of the car on the incline. The forces acting on the car are: weight (W), normal force (N), and friction force (f). The weight can be resolved into components parallel to the incline ($W_{\parallel}$) and perpendicular to the incline ($W_{\perp}$). The normal force is perpendicular to the incline, and the friction force is parallel to the incline, pointing up. Apply Newton's second law along the incline: $N \sin \theta - W_{\parallel} - f = ma$ where θ is the angle of the incline, a is the acceleration, and m is the mass of the car.	Method 2: Energy Use the work-energy theorem. The work done by the net force on the car is equal to the change in its kinetic energy. The forces doing work are the normal force, the weight, and the friction force. The normal force does no work because it is perpendicular to the displacement. The weight does work $W_{\parallel} \Delta x$, and the friction force does work $-f \Delta x$, where Δx is the distance traveled along the incline. Set the net work equal to the change in kinetic energy: $(N \sin \theta - W_{\parallel} - f) \Delta x = \frac{1}{2} m v^2$ where v is the final velocity of the car.

Visual Basic for Applications programs are explained for both graduate and undergraduate students and practicing engineers. The book emphasizes environmental protection, economics, and engineering design processes. It includes detailed chapters on irrigation, economics, soils, reference evapotranspiration, crop evapotranspiration, pipe flow, pumps, open channel flow, groundwater, center pivots, turf and landscape drip, orchards, wheel lines, hand lines, surfaces, greenhouse, hydroponics, soil water movement, drainage systems design, drainage and wetlands, contaminant fate and transport. It contains summaries, homework problems, and color photos. The book draws from the fields of fluid mechanics, soil physics, hydrology, soil chemistry, economics, and plant sciences to present a broad interdisciplinary view of the fundamental concepts in irrigation and drainage systems design.

Intro to Economics: Money, History & Fiscal Faith Parent Lesson Planner, 2014-03-01. Intro to Economics Money History materials for each semester are independent of one another to allow flexibility. Bankruptcy of Our Nation. It's no secret that the U.S. national debt is in the tens of trillions. But did you know that America also has future unfunded obligations of over 118 trillion? Unfortunately, America's politicians have no plan to solve our mounting fiscal and monetary crisis. But you don't have to watch this unfold in fear of your financial future. The time for debate is over. It's time to prepare. In this revised and expanded release of Bankruptcy of Our Nation, Jerry Robinson offers you the ultimate financial survival guide. Money Wise DVD. Money Wise is a fun, engaging, and fact-filled DVD journey into God's wisdom on work and money. Throughout Money Wise, Chad Hovind explores God's principles, His teachings, and His directions for living a life of liberty, prosperity, and generosity. Chad presents a biblical case for free market enterprise and offers God's perspective for the economic decisions of an individual, a family, and even a nation. Money Wise explains that God wants us to live a life of freedom to serve Him, to provide for ourselves, and to bless others.

Riegel's Handbook of Industrial Chemistry James A. Kent, 2012-12-06. The aim of this book is to present in a single volume an up-to-date account of the chemistry and chemical engineering which underlie the major areas of the chemical process industry. This most recent edition includes several new chapters which comprise important threads in the industry's total fabric. These new chapters cover waste minimization, safety considerations in chemical plant design and operation, emergency response planning, and statistical applications in quality control and experimental planning. Together with the chapters on chemical industry economics and wastewater treatment, they provide a unifying base on which the reader can most effectively apply the information provided in the chapters which describe the various areas of the chemical process industries. The ninth edition of this established reference work contains the contributions of some fifty experts from industry, government, and academe. I have been humbled by the breadth and depth of their knowledge and expertise, and by the willingness and enthusiasm with which they shared their knowledge and insights. They have, without exception, been unstinting in their efforts to make their respective chapters as complete and informative as possible within the space available. Errors of omission, duplication, and shortcomings in organization are mine. Grateful acknowledgment is made to the editors of technical journals and publishing houses for permission to reproduce

Rules of Thumb for Chemical Engineers Stephen M Hall,2012-07-27 Rules of Thumb for Chemical Engineers Fifth
Edition provides solutions common sense techniques shortcuts and calculations to help chemical and process engineers deal
with practical on the job problems It discusses physical properties for proprietary materials pharmaceutical and
biopharmaceutical sector heuristics and process design along with closed loop heat transfer systems heat exchangers packed
columns and structured packings Organized into 27 chapters the book begins with an overview of formulae and data for
sizing piping systems for incompressible and compressible flow It then moves to a discussion of design recommendations for
heat exchangers practical equations for solving fractionation problems along with design of reactive absorption processes It
also considers different types of pumps and presents narrative as well as tabular comparisons and application notes for
various types of fans blowers and compressors The book also walks the reader through the general rules of thumb for vessels
how cooling towers are sized based on parameters such as return temperature and supply temperature and specifications of
refrigeration systems Other chapters focus on pneumatic conveying blending and agitation energy conservation and process
modeling Online calculation tools Excel workbooks guidelines for hazardous materials and processes and a searchable Rules
