Institutional Failures Howard M. Wasserman, 2016-05-23 The authors of this new collection argue

that the many features of the now infamous Duke University men's lacrosse controversy are best understood in the context of the three major socio-legal institutions in which the drama played out. The legal system, Duke University, and the news media all struggled to respond to and handle the case tinged as the events were with race, sex, violence, class, privilege, and notions and perceptions about sports. The problems, missteps, mistakes, and injustice in the case resulted from each institution's failure to operate properly from the incentives built into each institution that affected individual behavior and from the inability of each institution to communicate and cooperate with the others. To understand the Duke lacrosse controversy is to study these institutions and to answer questions about the performance of each, to learn what each did right and wrong and why, and to consider how each can improve in the future. By examining the actions of these institutions and the individuals within them, these essays consider the role each played in the case, how each contributed to the crisis and to its resolution, the ways in which they interacted with one another, and the lessons this case teaches about the appropriate functioning of each institution.

Doing Ethics in Media Chris Roberts, Jay Black, 2021-11-29 The second edition of *Doing Ethics in Media* continues its mission of providing an accessible but comprehensive introduction to media ethics with a grounding in moral philosophy to help students think clearly and systematically about dilemmas in the rapidly changing media environment. Each chapter highlights specific considerations, cases, and practical applications for the fields of journalism, advertising, digital media, entertainment, public relations, and social media. Six fundamental decision-making questions, the 5Ws and H, around which the book is organized, provide a path for students to articulate the issues, understand applicable law and ethics codes, consider the needs of stakeholders, work through conflicting values, integrate philosophic principles, and pose a test of publicity. Students are challenged to be active ethical thinkers through the authors' reader-friendly style and use of critical, early-career examples. While most people will change careers several times during their lives, all of us are life-long media consumers, and *Doing Ethics in Media* prepares readers for that task. *Doing Ethics in Media* is aimed at undergraduate and graduate students studying media ethics in mass media, journalism, and media studies. It also serves students in rhetoric, popular culture, communication studies, and interdisciplinary social sciences. The book's companion website, doingethicsinmedia.com or www.doingmediaethics.com, provides continuously updated real-world media ethics examples and collections of essays from experts and students. The site also hosts ancillary materials for students and for instructors, including a test bank and instructor's manual.
