

HOW TO SET THE TIME ON AN ANALOG WATCH

Gently pull the crown out as far as it will go. The watch will spring when the crown is in the "out" position. If the crown has a "correction locking device," you may have to "unlock" it before you can pull the crown out. In this case, rotate the crown counter-clockwise toward the bottom of the watch. This unlocks the crown. When it is unlocked, gently pull the crown out as far as it will go.

Now, rotate the crown clockwise toward the top of the watch as the hands advance past the 12 o'clock position. If the day/date changes you are in the start position. If the day/date does not change you are in the stop position. Proceed to set the correct time and push the crown all the way back in. Make sure hand to set the time and slide in the date for correct day/date setting.

HOW TO SET THE DAY/DATE ON AN ANALOG WATCH

To set the day/date on an analog watch, gently pull the crown out to the first click position.

Rotate the crown clockwise toward the top of the watch face. The date on the watch will advance. If the number "display" in the window is too high, go past "12" and the counter will start at "1" again.

If your watch also displays a day/date window, set this by rotating the crown counter-clockwise toward the bottom of the watch face. The day/date will advance, going past Friday and returning to Monday if necessary. Stop one day before the correct day/date is set.

Now, pull the crown out another step and turn it clockwise as the hands move forward. When you pass 12, the day and date should change automatically to the correct date. If you are setting the watch before noon, stop as soon as you get to the correct time and push the crown all the way back in. If you are setting the watch after noon, go past 12 again before you stop at the correct time and push the crown all the way back in. If the watch is a "correction locking device," unlock the crown after setting the correct time by pressing down on the crown as you turn it clockwise.
