No Stop City Archizoom Associati:

No-stop City Andrea Branzi, 2006 In 1969 the Archizoom group while carrying out an experimental work in the field of design also undertook a research on environment mass culture and the city which led to the project No Stop City Gathering all the texts and drawings this book reveals to us the Endless City intertwining architecture with objects and the triumphant consumer society giving an interpretation where the repetition of a single central element a building or a group of objects makes up through a play of mirrors a catatonic environment a boundless supermarket a now reached future to be composed No Stop City is a qualityless city in which the individual can achieve his own housing conditions as a creative freed and personal activity The theoretical project was first published in the review Casabella in 1970 under the title City assembly line of social issues ideology and theory of the metropolis As Andrea Branzi puts it this project implements the idea of the fading away of architecture within metropolis No Stop City is a critical Utopia a model of global urbanization where design is the essential conceptual instrument used in the mutation of living patterns and territories

The Possibility of an Absolute Architecture Pier Vittorio Aureli, 2011-02-11 Architectural form reconsidered in light of a unitary conception of architecture and the city In *The Possibility of an Absolute Architecture* Pier Vittorio Aureli proposes that a sharpened formal consciousness in architecture is a precondition for political cultural and social engagement with the city Aureli uses the term absolute not in the conventional sense of pure but to denote something that is resolutely itself after being separated from its other In the pursuit of the possibility of an absolute architecture the other is the space of the city its extensive organization and its government Politics is agonism through separation and confrontation the very condition of architectural form is to separate and be separated Through its act of separation and being separated architecture reveals at once the essence of the city and the essence of itself as political form the city as the composition of separate parts Aureli revisits the work of four architects whose projects were advanced through the making of architectural form but whose concern was the city at large Andrea Palladio Giovanni Battista Piranesi tienne Louis Boull e and Oswald Mathias Ungers The work of these architects Aureli argues addressed the transformations of the modern city and its urban implications through the elaboration of specific and strategic architectural forms Their projects for the city do not take the form of an overall plan but are expressed as an archipelago of site specific interventions

Archigram Simon Sadler, 2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain s Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram s sense of fun takes its place beside the other cultural agitants of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was

assembled from the Apollo missions constructivism biology manufacturing electronics and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture

The Interior Urbanism Theory Reader Gregory Marinic, 2024-03-12 The Interior Urbanism Theory Reader expands our understanding of urbanism interiority and publicness from a global perspective across time and cultures From ancient origins to speculative futures this book explores the rich complexities of interior urbanism as an interstitial socio spatial condition Employing an interdisciplinary lens it examines the intersectional characteristics that define interior urbanism Fifty chapters investigate the topic in relation to architecture planning urban design interior architecture interior design archaeology engineering sociology psychology and geography Individual essays reveal the historical typological and morphological origins of interior urbanism as well as its diverse scales occupancies and atmospheres The Interior Urbanism Theory Reader will appeal to scholars practitioners students and enthusiasts of urbanism architecture planning interiors and the social sciences

The Project of Autonomy Pier Vittorio Aureli, 2008-07-04 The Project of Autonomy radically rediscusses the concept of autonomy in politics and architecture by tracing a concise and polemical argument about its history in Italy in the 1960 s and early 1970 s Architect and educator Pier Vittorio Aureli analyzes the position of the Operaismo movement formed by a group of intellectuals that produced a powerful and rigorous critique of capitalism and its intersections with two of the most radical architectural urban theories of the day Aldo Rossi s redefinition of the architecture of the city and Archizoom s No stop City Readers are introduced to major figures like Mario Tronti and Raniero Panzieri who have previously been little known in the English speaking world especially in an architectural context and to the political motivations behind the theories of Rossi and Archizoom The book draws on significant new source material including recent interviews by the author and untranslated documents PUBLISHER S WEBSITE

Spatial Concepts for Decolonizing the Americas Fernando Luiz Lara, Felipe Hernández, 2021-10-19 This collection of essays presents an innovative and provocative set of concepts to understand the spaces of the Americas through local lenses The disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter however the overwhelming majority of canonical knowledge in these fields originates in another continent and is external to the lived experience in such regions

The book introduces seven new concepts that have not been sufficiently addressed and would make a significant contribution to the field namely gridded spaces spaces of agriculture space as image watered spaces spaces as labor racialized spaces and gendered spaces This book thus introduces a broader conceptual framework to foster the analysis of the spatial histories of the Americas

For Nature/With Nature: New Sustainable Design Scenarios Claudio Gambardella, 2024-05-03 This volume contributes to the construction of a multi voice mosaic on the theme of Nature and the relationship between Man understood as designer and Nature by emphasizing the innovative and sustainable proposals coming from the discipline of design in its many facets and interdisciplinary contributions Since it isn't discussed the creative and economic effort that designers institutions and companies have been leading for years to improve human living conditions preference will be given to scientific contributions unpublished or not yet fully known case studies projects of strategies products systems and services theoretical contributions communication that are an expression of a new approach to Nature seen as our ally and object of an ethics of care The focus is the design both in its role as innovation driver and interpreter of social evolution that must be considered within the human nature relationship The topics identify some of the most relevant fields of development in which Design Driven Innovation can be developed in the respect of perspective of a new relationship with nature

Post DomestiCity Diego Garcia-Setien, Enrique Espinosa, Begona de Abajo, Almudena Ribot / CoLaboratorio, 2022-07-06

PostDomestiCity is an inquiry and speculative exercise into the conditions of obsolescence in the post industrial city from a contemporary perspective Working with three paradigmatic cases that were conceived from industrial logics the Packard plant in Detroit Lima's PREVI neighbourhood and the Grand Mare complex in Rouen we explore alternative ways of reusing reprogramming and redensifying the built environment as alternatives to demolition Relevant voices in the field of architecture share their approaches and visions of the future for the pre existing city helping us imagine post domesticity in the current climate crisis and socio technological context

Images of Class Jacopo Galimberti, 2022-09-06 The first overview of the unique encounter between artists and the prominent Marxist current Workerism also known as Operaismo During the 1960s and 1970s Workerism and Autonomia were prominent Marxist currents However it is rarely acknowledged that these movements inspired many visual artists such as the members of Archizoom Gordon Matta Clark and Gianfranco Baruchello This book focuses on the aesthetic and cultural discourse developed by three generations of militants including Mario Tronti Antonio Negri Bifo and Silvia Federici and how it was appropriated by artists architects graphic designers and architectural historians such as Manfredo Tafuri

Images of Class signposts key moments of this dialogue ranging from the drawings published on *classe operaia* to *Potere Operaio*'s exhibition in Paris the Metropolitan Indians zines a feminist art collective

who adhered to the Wages for Housework Campaign and the N group's experiments with Gestalt theory. Featuring more than 140 images of artworks many published here for the first time, this volume provides an original perspective on post-war Italian culture and new insights into some of the most influential Marxist movements of the twentieth and twenty-first centuries worldwide.

Planning Cities with Nature Fabiano Lemes de Oliveira, Ian Mell, 2019-02-02 This book explores novel theories, strategies and methods for re-naturing cities. It enables readers to learn from best practice and advances the current theoretical and empirical understanding in the field. The book also offers valuable insights into how planners and policymakers can apply this knowledge to their own cities and regions, exploring top-down, bottom-up and mixed mechanisms for the systemic re-naturing of planned and existing cities. There is considerable interest in naturalising cities since it can help address multiple global societal challenges and generate various benefits such as the enhancement of health and well-being, sustainable urbanisation, ecosystems and their services, and resilience to climate change. This can also translate into tangible economic benefits in terms of preventing health hazards, positively affecting health-related expenditure, new job opportunities, i.e. urban farming and the regeneration of urban areas. There is thus a compelling case to investigate integrative approaches to urban and natural systems that can help cities address the social, economic and environmental needs of a growing population. How can we plan with nature? What are the models and approaches that can be used to develop more sustainable cities that provide high-quality urban green spaces?

Architecture, Crisis and Resuscitation Tahl Kaminer, 2011-01-20 Studying the relation of architecture to society, this book explains the manner in which the discipline of architecture adjusted itself in order to satisfy new pressures by society. Consequently, it offers an understanding of contemporary conditions and phenomena ranging from the ubiquity of landmark buildings to the celebrity status of architects. It concerns the period spanning from 1966 to the first years of the current century, a period which saw radical change in economy, politics and culture, and a period in which architecture radically transformed, substituting the alleged dreariness of modernism with spectacle.

Radical Cindi Strauss, 2020-02-25 This essential survey of Italian Radical design, a movement that interrogated modern living against the turbulent political climate of the 1960s, is lavishly illustrated with new photography including rarely seen prototypes and limited production pieces.

Graphic Assembly Craig Buckley, 2019-01-29 An innovative look at the contribution of montage to twentieth-century architecture, *Graphic Assembly* unearths the role played by montage and collage in the development of architectural culture over the past century, revealing their unexamined yet crucial significance. Craig Buckley brings together experimental architectural practices based in London, Paris, Vienna and Florence, showing how breakthroughs in optical media and printing technologies enabled avant-garde architects to reimagine their field. *Graphic Assembly* considers a range of architects and movements from the 1950s through the early 70s, including Theo Crosby, Hans Hollein and John McHale, the magazine *Clip Kit* and the groups Archigram, Superstudio and Utopie. It gives a thorough account of how montage concepts informed the design of buildings, prototypes,

models exhibitions and multimedia environments accompanied by Buckley's insightful interpretations of the iconic images exhibitions and buildings of the 1960s that mark how the decade is remembered Richly illustrated with never before published material from more than a dozen archives and private collections Graphic Assembly offers a comparative overview of the network of experimental architectural practice in Europe It provides a deep historical account of the cut and paste techniques now prevalent with architecture's digital turn demonstrating the great importance of montage to architecture past present and future

The Stack Benjamin H. Bratton, 2016-02-19 A comprehensive political and design theory of planetary scale computation proposing that The Stack an accidental megastructure is both a technological apparatus and a model for a new geopolitical architecture What has planetary scale computation done to our geopolitical realities It takes different forms at different scales from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems from interfaces drawn by the augmentation of the hand and eye to users identified by self quantification and the arrival of legions of sensors algorithms and robots Together how do these distort and deform modern political geographies and produce new territories in their own image In The Stack Benjamin Bratton proposes that these different genres of computation smart grids cloud platforms mobile apps smart cities the Internet of Things automation can be seen not as so many species evolving on their own but as forming a coherent whole an accidental megastructure called The Stack that is both a computational apparatus and a new governing architecture We are inside The Stack and it is inside of us In an account that is both theoretical and technical drawing on political philosophy architectural theory and software studies Bratton explores six layers of The Stack Earth Cloud City Address Interface User Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling not only computational forms but also social human and physical forces This model informed by the logic of the multilayered structure of protocol stacks in which network technologies operate within a modular and vertical order offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention The Stack is an interdisciplinary design brief for a new geopolitics that works with and for planetary scale computation Interweaving the continental urban and perceptual scales it shows how we can better build dwell within communicate with and govern our worlds thestack.org

The Good Metropolis Alexander

Eisenschmidt,2019-01-29 The publication presents the first historical analysis of the tension between the city and architectural form It introduces 20th century theories to construct a historical context from which a new architecture city relationship emerged The book provides a conceptual framework to understand this relationship and comes to the conclusion that urbanization may be filled with potential i e be a Good Metropolis Loose-Fit Architecture Alex Lifschutz,2018-02-05 Loose Fit Architecture Designing Buildings for Change September October 2017 Profile 249 Volume 87 No 5 ISBN 978 1119 152644 Guest Edited by Alex Lifschutz The idea that a building is finished or complete on the day it opens its doors is hardwired into existing thinking about design planning and construction But this ignores the unprecedented rate of social and technological change A building only begins its life when the contractors leave With resources at a premium and a greater need for a sustainable use of building materials can we still afford to construct new housing or indeed any buildings that ignore the need for flexibility or the ability to evolve over time Our design culture needs to move beyond the idealisation of a creative individual designer generating highly specific forms with fixed uses The possibilities of adaptation and flexibility have often been overlooked but they create hugely exciting loose fit architectures that emancipate users to create their own versatile and vibrant environments Contributors include Stewart Brand Renee Chow Ellen Dunham Jones and June Williamson John Habraken Edwin Heathcote Despina Katsakakis Stephen Kendall Ian Lambot Giorgio Macchi Alexi Marmot Andrea Martin Kazunobu Minami Peter Murray Brett Steele and Simon Sturgis **The Cinema of Urban Crisis** Lawrence Webb,2025-10-01 In the 1970s cities across the United States and Western Europe faced a deep social and political crisis that challenged established principles of planning economics and urban theory At the same time film industries experienced a parallel process of transition the effects of which rippled through the aesthetic and narrative form of the decade s cinema The Cinema of Urban Crisis traces a new path through the cinematic legacy of the 1970s by drawing together these intertwined histories of urban and cultural change Bringing issues of space and place to the fore the book unpacks the geographical and spatial dynamics of film movements from the New Hollywood to the New German Cinema showing how the crisis of the seventies and the emerging postindustrial economy brought film and the city together in new configurations Chapters cover a range of cities on both sides of the Atlantic from New York Philadelphia and San Francisco to London Paris and Berlin Integrating analysis of film industries and production practices with detailed considerations of individual texts the book offers strikingly original close analyses of a wide range of films from New Hollywood The Conversation The King of Marvin Gardens Rocky to European art cinema Alice in the Cities The Passenger Tout va Bien and popular international genres such as the political thriller and the crime film Focusing on the aesthetic and representational strategies of these films the book argues that the decade s cinema engaged with and helped to shape the passage from the urban crisis of the late sixties to the neoliberal urban renaissance of the early eighties Splicing ideas from film studies with urban geography and architectural history the book offers a fresh perspective on a rich period of film history and opens up new directions for

critical engagement between film and urban studies Sound Worlds of Japanese Gardens Michael D. Fowler, 2014-07-15
Michael D Fowler presents an interdisciplinary approach to investigating the sound world of traditional Japanese gardens by drawing from the diverse fields of semiotics acoustic ecology philosophy mathematical modelling architecture music landscape theory and acoustic analysis Using projects ranging from data visualisations immersive sound installations algorithmically generated meta gardens and proto architectural form finding missions as creative paradigms the book offers a new framework for artistic inquiry in which the sole objective is the generation of new knowledge through the act of spatial thinking Informality through Sustainability Antonino Di Raimo, Steffen Lehmann, Alessandro Melis, 2020-12-30 Informality through Sustainability explores the phenomenon of informality within urban settlements and aims to unravel the subtle links between informal settlements and sustainability Penetrating its global profile and considering urban informality through an understanding of local implications the authors collectively reveal specific correlations between sites and their local inhabitants The book opposes simplistic calls to legalise informal settlements or to view them as problems to be solved It comes at a time when common notions of informality are being increasingly challenged In 25 chapters the book presents contributions from well known scholars and practitioners whose theoretical or practical work addresses informality and sustainability at various levels from city planning and urban design to public space and architectural education Whilst previous studies on informal settlements have mainly focused on cases in developing countries approaching the topic through social cultural and material dimensions the book explores the concept across a range of contexts including former Communist countries and those in the so called Global North Contributions also explore understandings of informality at various scalar levels region precinct neighbourhood and individual building Thus this work helps reposition informality as a relational concept at various scales of urbanisation This book will be of great benefit to planners architects researchers and policymakers interested in the interplay between informality and sustainability
