 2015 Solved Papers 2016 Solved Papers 2017 Solved Papers 2017 18 Solved Paper 2019 *User Experience in Libraries*
 Andy Priestner, Matt Borg, 2016-05-23 Modern library services can be incredibly complex Much more so than their forebears
 modern librarians must grapple daily with questions of how best to implement innovative new services while also maintaining
 and updating the old The efforts undertaken are immense but how best to evaluate their success In this groundbreaking new
 book from Routledge library practitioners anthropologists and design experts combine to advocate a new focus on User
 Experience or UX research methods Through a combination of theoretical discussion and applied case studies they argue
 that this ethnographic and human centred design approach enables library professionals to gather rich evidence based
 insights into what is really going on in their libraries allowing them to look beyond what library users say they do to what
 they actually do Edited by the team behind the international UX in Libraries conference *User Experience in Libraries* will
 ignite new interest in a rapidly emerging and game changing area of research Clearly written and passionately argued it is
 essential reading for all library professionals and students of Library and Information Science It will also be welcomed by
 anthropologists and design professionals working in related fields **Green Jobs for Sustainable Development**
 Ana-Maria Boromisa, Sanja Tišma, Anastasya Ležaić, 2015-06-26 A green economy must be built on green jobs the kind of
 employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to
 define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions
 including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company
 which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This
 book deals with the relationship between green concepts green jobs green economy green growth and sustainable
 development It examines to which extent creation of green jobs supports overall economic development as opposed to
 creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy
 green growth and green policy are presented as well as their implementation in ten countries selected among the Group of
 Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of
 Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that
 although green concept is well intentioned its implementation depends on local circumstances economic political and social

Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics *Tax, Inequality, and Human Rights* Philip Alston,Nikki Reisch,2019-04-11 In *Tax Inequality and Human Rights* experts in human rights law and in tax law debate the linkages between the two fields and highlight how each can help to tackle rapidly growing inequality in the economic social and political realms Against a backdrop of systemic corporate tax avoidance widespread use of tax havens persistent pressures to embrace austerity policies and growing gaps between the rich and poor this book encourages readers to understand fiscal policy as human rights policy and thus as having profound consequences for the well being of citizens around the world Prominent scholars and practitioners examine how the foundational principles of tax law and human rights law intersect and diverge discuss the cross border nature and human rights impacts of abusive practices like tax avoidance and evasion question the reluctance of states to bring transparency and accountability to tax policies and practices highlight the responsibility of private sector actors for shaping and misshaping tax laws and critically evaluate domestic tax rules through the lens of equality and nondiscrimination The contributing authors also explore how international human rights obligations should influence the framework for both domestic and international tax reforms They address what human rights law requires of state tax policies and how tax laws and loopholes affect the enjoyment of human rights by people outside a state s borders Because tax and human rights both turn on the relationship between the individual and the state neo liberalism s erosion of the social contract threatens to undermine them both **Names and Naming** Guy Puzey,Laura Kostanski,2016-02-02 This book explores international trends in naming and contributes to the growing field of onomastic enquiry Naming practices are viewed here through a critical lens demonstrating a high level of political and social engagement in relation to how we name people and places The contributors to this publication examine why names are not only symbols of a person or place but also manifestations of cultural linguistic and social heritage in their own right Presenting analyses of geographically and culturally diverse perspectives and case studies the book investigates how names can represent deeper kinds of identity act as objects of attachment and dependence and reflect community mores and social customs while functioning as powerful mechanisms of inclusion and exclusion The book will be of interest to researchers in onomastics sociology human geography linguistics and history *Smart Sensors and Systems* Chong-Min Kyung,Hiroto Yasuura,Yongpan Liu,Youn-Long Lin,2016-10-16 This book describes the technology used for effective sensing of our physical world and intelligent processing techniques for sensed information which are essential to the success of Internet of Things IoT The authors provide a multidisciplinary view of sensor technology from materials process circuits and big data domains and showcase smart sensor systems in real applications including smart home transportation medical environmental agricultural etc Unlike earlier books on sensors this

book provides a global view on smart sensors covering abstraction levels from device circuit systems and algorithms

Dynamic Systems for Everyone Asish Ghosh, 2016-11-08 Systems are everywhere and we are surrounded by them We are a complex amalgam of systems that enable us to interact with an endless array of external systems in our daily lives They are electrical mechanical social biological and many other types that control our environment and our well being By appreciating how these systems function will broaden our understanding of how our world works Readers from a variety of disciplines will benefit from the knowledge of system behavior they will gain from this book and will be able to apply those principles in various contexts The treatment of the subject is non mathematical and the book considers some of the latest concepts in the systems discipline such as agent based systems optimization and discrete events and procedures The diverse range of examples provided in this book will allow readers to Apply system knowledge at work and in daily life without deep mathematical knowledge Build models and simulate system behaviors on a personal computer Optimize systems in many different ways Reduce or eliminate unintended consequences Develop a holistic world view This book will enable readers to not only better interact with the systems in their professional and daily lives but also allow them to develop and evaluate them for their effectiveness in achieving their designed purpose Comments from Reviewers This is a marvelously well written introduction to Systems Thinking and System Dynamics I like it because it introduces Systems Thinking with meaningful examples which everyone should be able to readily connect Gene Bellingier Organizational theorist systems thinker and consultant Director Systems Thinking World Excellent book very well written Mr Ghosh s world view of system thinking is truly unique Peter A Rizzi Professor Emeritus University of Massachusetts Dartmouth A thorough reading of the book provides an interesting way to view many problems in our society Bradford T Stokes Poppleton Chair and Professor Emeritus The Ohio State University College of Medicine This is a very good and very readable book that is a must read for any person involved in systems theory in any way which may actually include just about everyone Peter G Martin Vice President Business Value Consulting Schneider Electric

Breaching the Citadel: The India Papers I Urvashi Butalia, (eds.), Laxmi Murthy, 2018-12-05 The Sexual Violence and Impunity in South Asia research project coordinated by Zubaan and supported by the International Development Research Centre brings together for the first time in the region a vast body of knowledge on this important yet silenced subject Six country volumes one each on Bangladesh Nepal Pakistan Sri Lanka and two on India comprising over fifty research papers and two book length studies detail the histories of sexual violence and look at the systemic institutional societal individual and community structures that work together to perpetuate impunity for perpetrators Breaching the Citadel showcases new and pathbreaking research on the structures that contribute towards creating and sustaining impunity for perpetrators of sexual violence Focusing on medical protocols the functioning of the law the psycho social making of impunity the media history and current politics the book makes a valuable addition to work on Kashmir the Northeast of India Chhattisgarh and other regions of violence that are discussed in its sister publication Fault

Lines of History This book is a must read for students of women and gender studies conflict development history current politics and sexuality studies Neighbourhood Policy and the Construction of the European External Borders Filippo Celata, Raffaella Coletti, 2015-06-11 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries By bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players

Conceptualizing Terrorism Anthony Richards, 2015 Conceptualising Terrorism argues that while there have always been good reasons for striving for a universally agreed definition of terrorism there are further reasons for doing so in the post 9 11 environment notwithstanding the formidable challenges that confront such an endeavour Mediterranean Green Buildings & Renewable Energy Ali Sayigh, 2016-12-11 This book highlights scientific achievements in the key areas of sustainable electricity generation and green building technologies as presented in the vital bi annual World Renewable Energy Network's Med Green Forum Renewable energy applications in power generation and sustainable development have particular importance in the Mediterranean region with its rich natural resources and conducive climate making it a perfect showcase to illustrate the viability of using renewable energy to satisfy all energy needs The papers included in this work describe enabling policies and offer pathways to further develop a broad range of renewable energy technologies and applications in all sectors for electricity production heating and cooling agricultural applications water desalination industrial applications and for the transport sector

Decoding **Nov 2014 Paperb S**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring.
