November 2005 Geography A Level Paper 2 Zimsec:

The Economics of Climate Change Nicholas Herbert Stern, Great Britain. Treasury, 2007-01-04 Independent rigorous and comprehensive analysis of the economic aspects of climate change Agricultural Reform in Rwanda Chris Huggins, 2017-10-15 International observers have lauded Rwanda as an example of an African country taking control of its own development trajectory and as a market friendly destination for investment A key component of this narrative has been an ambitious programme of agricultural reform involving private firms NGOs and international charities The Rwandan government claims these reforms have been a resounding success tripling crop yields and helping to combat hunger Chris Huggins argues however that Rwanda's liberal modernising image sits poorly with the regime's continuing authoritarian tendencies Featuring in depth case studies of the effects of agricultural reform in three different regions and drawing on hundreds of interviews Huggins shows that the much vaunted liberalization of agriculture has in fact depended on the coercion of Rwandan farmers and in many cases has had a detrimental impact on their livelihoods With the Kagame regime now coming under increasing international scrutiny this work provides a timely look at the impact of market friendly authoritarianism in contemporary Africa making essential reading for students and scholars of development in the fields of sociology anthropology political science and economics *Globalisation, Employment and Mobility* H. J. Ndulu, 2007 Poverty in Africa is largely the outcome of slow growth With the region hosting 10 percent of the world's population but a staggering 30 percent of the world's poor the challenges it faces are enormous but NOT insurmountable The message of this book is clear poverty eradicating development in Africa is possible In fact there are indications that Africa is at a turning point and there is growing momentum among front runner economies in the region toward higher and sustained growth This study challenges African countries and their development partners to consolidate and continue this momentum and to exploit the advantages of the continent as a latecomer particularly in innovation and in drawing lessons from successful export led growth experiences in Asia and Latin America *Challenges of African Growth* identifies opportunities constraints and strategic choices that African countries face in their quest for achieving the growth necessary for poverty alleviation More important the study provides a broad menu of strategic options for ensuring not only that countries embark on a growth path but also that the growth is shared and sustainable The critical areas for action rest on four pillars the investment climate infrastructure innovation for increasing productivity and competitiveness and institutional capacity
