Poor Numbers Morten Jerven, 2013-01-24 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity Reliable statistics including estimates of economic growth rates and per capita income are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data The paucity of accurate statistics is not merely a technical problem it has a massive impact on the welfare of citizens in developing countries Where do these statistics originate How accurate are they Poor Numbers is the first analysis of the production and use of African economic development statistics Morten Jerven s research shows how the statistical capacities of sub Saharan

African economies have fallen into disarray The numbers substantially misstate the actual state of affairs As a result scarce resources are misapplied Development policy does not deliver the benefits expected Policymakers attempts to improve the lot of the citizenry are frustrated Donors have no accurate sense of the impact of the aid they supply Jerven s findings from sub Saharan Africa have far reaching implications for aid and development policy As Jerven notes the current catchphrase in the development community is evidence based policy and scholars are applying increasingly sophisticated econometric methods but no statistical techniques can substitute for partial and unreliable data **Uncovering African Agency** Lucy

Corkin,2016-02-17 China s engagement in Africa is generally portrayed simply as African countries being exploited for their mineral wealth by a wealthy political and economic superpower Is this always the case Certain African countries have been able to use China s involvement in the region to grow their economies and solicit renewed interest from previously disengaged foreign powers by using their relationship with China to bolster their political capital In this thought provoking and original work Lucy Corkin demonstrates how Angola has been amongst the most successful of African nations in this role The concept of African agency covers a wide range of different countries with very different capabilities and experiences of engaging with China In each individual county there are a myriad of actors all with increasingly discernible agencies

projects different forms of political violence structural crisis or even natural disasters evokes many stereotyped assumptions about those forcibly displaced or emplaced At the same time there is a problematic lack of attention paid to the diversity of actors strategies and practices that reshape the world in the face and chronic aftermath of dramatic moments of violent dislocation In this highly original volume based on empirical case studies from across sub Saharan Africa the authors reveal the paradoxical effects both intended and unexpected that displacement produces and that manifest themselves in displacement economies An important contribution to a topic of growing scholarly and policy interest Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa Nojiyeza, Innocent Simphiwe,Mtapuri, Oliver,Bazaanah, Prosper,Netshiozwi, Edzisani Ellen,2022-01-28 Access to water and sanitation remains a critical challenge in various countries in Africa The crisis remains the crisis of governance rather than the physical and economic scarcity In most countries water is realized as a human right and subsidies are provided for the indigent households The tricky issue in rural areas remains an issue of access that is often linked to willingness and ability to pay for the installation and daily consumption The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management IWRM implementation in African countries It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change Covering topics such as climate justice ecological governance and political ecology this major reference work is a dynamic resource for government officials sociologists climate scientists activists students and educators of higher education academicians and researchers in the fields of social sciences government developmental studies international relations and political science *The Hard Road to Reform* Brian Raftopolos,2013-02-17 The defeat of ZANU PF in the 2008 parliamentary election marked the end of one party rule in Zimbabwe The Global Political Agreement signed later that resulted in a Government of National Unity and the former ruling party was for the first time faced with the reality of sharing power The Hard Road to Reform presents a penetrating analysis of developments since the GNU was established reviewing recent political history from a range of perspectives political economic social and historical and featuring the best work of Zimbabwe s young scholars As Brian Raftopolos writes in his introduction the book is an attempt to analyse and assess both the hopes and frustrations of the last four years and to confront the harsh challenges that lie ahead **Christian Theological Education and the Response to the Crisis in Zimbabwe** Bekithemba Dube,Gift Masengwe,2025-10-02 The book offers an incisive examination of the governing philosophy of the Zimbabwe African National Union Patriotic Front ZANU PF referred to as Zanupfism characterizing it as marked by callousness and malevolence towards dissenting voices from civil society and opposition factions This pernicious application of power extends beyond mere verbal aggression to encompass militaristic actions engendering a profound generational crisis within Zimbabwe The contributors explore the compelling juxtaposition between President Emmerson Mnangagwa and

the biblical Nebuchadnezzar II a ruler notorious for his autocratic reign and expansive ambitions Further critically scrutinizing the complicity of neo Pentecostal prophets in the book reveals how these religious figures promote an esoteric understanding of the divine diverging from a theology rooted in justice thereby enabling the oppressive regime's practices This critique underscores the imperative for prophets to recalibrate their theological perspectives urging them to move beyond magical interpretations of faith toward an authentic engagement with a personal God who champions justice The book further encompasses the complex interplay of political and religious narratives examining how church leaders either bolster or undermine Mnangagwa's political ideology highlighting the tendency among certain religious factions to deify political authority ultimately exacerbating societal inequities In advocating for a transformative theological discourse in Zimbabwe the book asserts that religious narratives must serve as instruments for fostering democracy social justice and equity rather than sustaining a status quo that entrenches authoritarian governance The necessity for unified principled resistance grounded in the collective agency of the populace emerges as a salient theme in the quest for meaningful political and social reform
