C. Knights,1981-06-04 This is a

selection of essays by one of the most distinguished of modern literary critics L C Knights published as a companion volume to the selection of Professor Knights Shakespearean essays which appeared in 1979 The essays span almost four decades of critical work on authors as diverse as Marlowe George Herbert Clarendon and Henry James At the centre of each essay is an attempt to elicit some essential quality in the author or authors discussed Although each can be read as an isolated critical essay the different pieces are linked by a pervasive interest in the conditions social or personal out of which particular works emerged and in the way in which major works of the imagination are renewed as they are re interpreted in successive generations Throughout the underlying assumption is that literary criticism needs to be pure the result of direct exposure to particular works but that it cannot remain purely literary if only because the meaning of literature includes its effects on the lives and conduct of individual human beings Sleep, Its Physiology, Pathology, Hygiene, and Psychology ,1897 Critical

Theories of Anti-Semitism Jonathan Judaken,2024-06-04 Despite its persistence and viciousness anti Semitism remains undertheorized in comparison with other forms of racism and discrimination How should anti Semitism be defined What are its underlying causes Why do anti Semites target Jews In what ways has Judeophobia changed over time What are the continuities and disconnects between medieval anti Judaism and the Holocaust How does criticism of the state of Israel relate to anti Semitism And how can social theory illuminate the upsurge in attacks on Jews today Considering these questions and many more this book is at once a philosophical reflection on key problems in the analysis of anti Semitism and a history of its leading theories and theorists Jonathan Judaken explores the methodological and conceptual issues that have vexed the study of Judeophobia and calls for a reconsideration of the definitions categories and narratives that underpin overarching explanations He traces how a range of thinkers have wrestled with these challenges examining the theories of Jean Paul Sartre the Frankfurt School Hannah Arendt and Jean Fran ois Lyotard alongside the works of sociologists Talcott Parsons and Zygmunt Bauman and historians L on Poliakov and George Mosse Judaken argues against claims about the uniqueness of Judeophobia demonstrating how it is entangled with other racisms Islamophobia Negrophobia and xenophobia Critical Theories of Anti-Semitism not only urges readers to question how they think about Judeophobia but also draws them into

conversation with a range of leading thinkers whose insights are sorely needed in this perilous moment

Economics for Humanity Mitsuaki Okabe, 2024-08-26 Economics is often referred to as the queen of social sciences. This is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus, an image of human beings showing interest in only material fulfilment and acting solely in his interest. This book challenges this basic perception of human beings. By replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines, the book tries to provide a novel and more plausible picture of human society. Specifically, the book takes in such human aspects as pursuing well-being, forming human networks, and the realisation of potential of ability. Thus, if we try to better understand human motives and the society, it becomes necessary to replace the conventional two-sector market government social model with a more general and theoretically superior social model, the three-sector model consisting of market, government, and non-profit sectors. This book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses. Moreover, the book has introduced a newly developing practical philosophy in Japan over the last 50 years to achieve both individual well-being and better human society.

The State of the Psychoanalytic Nation, Volume I Paul Cundy, Jessica Yakeley, 2023-12-01 This book charts the ways in which psychoanalytic psychotherapy has been implemented, developed, and researched within the public sectors of twelve different countries around the world. It discusses how psychoanalytic practitioners locally have responded to the challenge of evidence-based practice. For each country, the authors describe how people can access talking therapies as part of the national healthcare system, including a brief history of how this system has developed and the place of psychoanalytic psychotherapy inside and outside of this system, historically. How clinicians train and qualify as a psychoanalytic practitioner, and demographic profiles of their communities of psychoanalytic practice. How evidence-based practice has impacted the mental health system and, in particular, access to and provision of talking therapies, e.g. through the development and implementation of treatment guidelines. How outcome monitoring and reporting of access, waiting times, and recovery rates are used in the commissioning and provision of psychological therapies. What is needed to secure a viable future for psychoanalytic psychotherapy. The first of two volumes, this book will be of great interest to all practicing psychoanalysts and psychoanalytic psychotherapists. The chapters in these volumes were originally published as special issues of Psychoanalytic Psychotherapy.
