Scientific Method and Characteristics of Life

In the following situation, identify the hypothesis, independent variable, dependent variable, the control and constants.

After studying about recycling, members of John's biology class investigated the effect of various recycled products on plant growth. John's lab group compared the effect of different aged grass compost on bean plants. Because decomposition is necessary to release the nutrients, the group hypothesized that older grass compost would produce taller bean plants. Three flats of bean plants (25 plants/ flat) were grown for 5 days. The plants were fertilized as follows: (a) Flat A: 450 g of three-month-old compost, (b) Flat B: 450 g of six-month-old compost, and (c) Flat C: 0 g compost. The plants received the same amount of sunlight and water each day. At the end of the 30 days the group recorded the height of the plants (cm).

Hypothesis: If an older grass compost is used, then the bean plants will grow taller

IV: Age of grass compost (months)

DV: Height of Plants (cm)

control: Flat C- no compost

constants: amount of sunlight, water, amount of time to grow, type of plant, number of plants

In the following situations, identify the hypothesis, independent variable, dependent variable, the control and experimental group.

1. The addition of the chemical calcium chloride (CaCl_2) to water will increase its temperature.

Hypothesis: If calcium chloride is added to water then the temperature of the water will increase.

Independent Variable: Calcium Chloride

Dependent Variable: temperature of water

Control Group: Group with no Calcium Chloride

Experimental Group: Groups with varying amounts of CaCl_2

2. Watering a plant with salt water will kill the plant.

Hypothesis: If a plant is watered with salt water then the plant will die.

Independent Variable: salt water

Dependent Variable: health of the plant

Control Group: plant with regular water

Experimental Group: Groups with varying amounts of salt water

3. A person that takes a vitamin supplement has better memory retention.

Hypothesis: If a person takes vitamin supplements then the person will have a better memory.

Independent Variable: vitamin supplements

Dependent Variable: memory of person

Control Group: people with no vitamins

Experimental Group: people with different types of vitamins OR Groups with varying amounts of vitamins
