Dismantling Contemporary Deficit Thinking Richard R. Valencia, 2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias. It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning. Dismantling Contemporary Deficit Thinking provides comprehensive critiques and anti-deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking. Dismantling Contemporary Deficit Thinking examines the ongoing social construction of deficit thinking in three aspects of current discourse: the genetic pathology model, the culture of poverty model, and the at-risk model, in which poor students, students of color, and their families are pathologized and marginalized. Richard R. Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation's public schools. Valencia also discusses a number of proactive anti-deficit thinking suggestions from the fields of teacher education, educational leadership, and educational ethnography that are intended to provide a more equitable and democratic schooling for all students. Students of Color and the Achievement Gap Richard R. Valencia, 2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U.S. K-12 public education: the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts. Award-winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap, focusing on Black and Latino/Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective, and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12 education. Students of Color and the Achievement Gap makes a persuasive and well-documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political, economic, and cultural frameworks. **Chicano School Failure and Success** Richard R. International Deficit Thinking Richard R. Valencia, 2020 International Deficit Thinking Educational Thought and Practice explores the incontrovertible reality of the persistent and pervasive academic achievement gap in many countries between marginalized students primarily of color and their economically advantaged White counterparts For example International Deficit Thinking discusses the cases of low socioeconomic Black and Mexican American students in the U S Indigenous Maori students in New Zealand and immigrant Moroccan and Turkish pupils in Belgium The predominant theoretical perspective that has been advanced to explain the school failure of marginalized students is the deficit thinking paradigm a parsimonious endogenous and pseudoscientific model that blames such students as the makers of their own school failure Deficit thinking asserts that the low academic achievement of many marginalized students is due to their limited intellectual ability poor academic achievement motivation and being raised in dysfunctional families and cultures Drawing from in part critical race theory systemic inequality analysis and colonialism postcolonialism award winning author and scholar Richard Valencia examines deficit thinking in education in 16 countries e g Canada Peru Australia England India South Africa He seeks to document and debunk deficit thinking as an interpretation for school

failure of marginalized students to offer scientifically defensible counternarratives for race class language and gender based differences in academic achievement to provide suggestions for workable and sustainable school reform for marginalized students

Chicana/o Struggles for Education Guadalupe San Miguel, 2013-04-29 Much of the history of Mexican American educational reform efforts has focused on campaigns to eliminate discrimination in public schools However as historian Guadalupe San Miguel demonstrates in *Chicana/o Struggles for Education* Activism in the Community the story is much broader and more varied than that While activists certainly challenged discrimination they also worked for specific public school reforms and sought private schooling opportunities utilizing new patterns of contestation and advocacy In documenting and reviewing these additional strategies San Miguel's nuanced overview and analysis offers enhanced insight into the quest for equal educational opportunity to new generations of students San Miguel addresses questions such as what factors led to change in the 1960s and in later years who the individuals and organizations were that led the movements in this period and what motivated them to get involved and what strategies were pursued how they were chosen and how successful they were He argues that while Chicana/o activists continued to challenge school segregation in the 1960s as earlier generations had they broadened their efforts to address new concerns such as school funding testing English only curricula the exclusion of undocumented immigrants and school closings They also advocated cultural pride and memory inclusion of the Mexican American community in school governance and opportunities to seek educational excellence in private religious nationalist and secular schools The profusion of strategies has not erased patterns of de facto segregation and unequal academic achievement San Miguel concludes but it has played a key role in expanding educational opportunities The actions he describes have expanded extended and diversified the historic struggle for Mexican American education

The Battle Over Bilingual Ballots James

Thomas Tucker,2016-03-23 In recent years few federal requirements have been as controversial as the mandate for what critics call bilingual ballots The Voting Rights Act of 1965 included a permanent requirement for language assistance for Puerto Rican voters educated in Spanish and ten years later Congress banned English only elections in certain covered jurisdictions expanding the support to include Alaska Natives American Indians Asian language voters and Spanish language

voters Some commentators have condemned the language assistance provisions underlying many of their attacks with anti immigrant rhetoric Although the provisions have been in effect for over three decades until now no comprehensive study of them has been published This book describes the evolution of the provisions examining the evidence of educational and voting discrimination against language minorities covered by the Act Additional chapters discuss the debate over the 2006 amendments to the Voting Rights Act analysis of objections raised by opponents of bilingual ballots and some of the most controversial components of these requirements including their constitutionality cost and effectiveness Featuring revealing case studies as well as analysis of key data this volume makes a persuasive and much needed case for bilingual ballots presenting a thorough investigation of this significant and understudied area of election law and American political life

The Making of a Teenage Service Class Ranita Ray, 2018 Stereotypes of economically marginalized black and brown youth focus on drugs gangs violence and teen parenthood Families schools nonprofit organizations and institutions in poor urban neighborhoods emphasize preventing such risk behaviors In *The Making of a Teenage Service Class* Ranita Ray uncovers the pernicious consequences of concentrating on risk behaviors as key to targeting poverty Having spent three years among sixteen black and Latina o youth Ray shares their stories of trying to beat the odds of living in poverty Their struggles of hunger homelessness and untreated illnesses are juxtaposed with the perseverance of completing homework finding jobs and spending long hours traveling from work to school to home By focusing on the lives of youth who largely avoid drugs gangs violence and teen parenthood the book challenges the idea that targeting these risk behaviors is key to breaking the cycle of poverty Ray compellingly demonstrates how the disproportionate emphasis on risk behaviors reinforces class and race hierarchies and diverts resources that could support marginalized youth s basic necessities and educational and occupational goals Provided by publisher
