Joseph P. Laycock

Richard Shaver Rock S:

Rokfogo Richard Toronto, Doug Skinner, Lora Santiago, 2014-09-25 In 1960 science fiction writer Richard Sharpe Shaver discovered rock books on his Wisconsin farm. He concluded they were not just rocks but intelligently designed documents that recorded the history of an ancient pre-deluge civilization. For 15 years he decoded the rock book texts and images he found embedded in stone and soon began painting and photographing what he found. It was an alien world that few other than Shaver could see. Shaver also wrote essays to compliment his paintings. He wrote of the people and customs of Earth's pre-history: the half-human, half-fish Mermen and women documenting their daily lives in intimate detail. He left behind a body of work that has languished in obscurity for decades. Richard Toronto has gathered together the largest collection of Shaver's art ever to see print. Presented in two volumes with more than 300 illustrations, **Rokfogo: The Mysterious Pre-Deluge Art of Richard S. Shaver** presents the paintings, photographs, and essays that made up Richard Shaver's ante-diluvian cosmology. Now considered an Outsider artist, Shaver was a pulp fiction writer during Amazing Stories' golden era. Shunned by mainstream science fiction fans for his radical ideas, Shaver died in obscurity in 1975, leaving behind his legacy of the sensual art of the ancients.

This Tragic Earth Richard S. Shaver, 2014-09-24 **THIS TRAGIC EARTH: The Art and World of Richard Sharpe Shaver** is finally back in print in a new expanded and improved edition. **HIS TRAGIC EARTH** gives a unique, long overdue look into the art and mind of Richard S. Shaver. Featuring a transcription of an actual hand-made book proposal by Shaver sent to Ray Palmer, this volume also contains 190 images, including over 100 lost images taken from one of a kind **rogfogo** or rock books by Shaver. These images, taken from photo-exposures of slices of solid rock, contain eerie and inexplicable images of people, monsters, creatures, structures, and devices—images which defy all rational explanation. Shaver claimed that these books were records left in crystal holography by an ancient race of beings who preceded man on this planet or were contemporary with our ancestors. Also featured are long-lost articles on how to find and create such images, written and illustrated by Shaver himself, along with unique correspondence, interviews, and other material that give a unique look into the mind and theories of Richard S. Shaver, his one-of-a-kind outsider artwork, and his infamous Shaver Mystery. Much of the additional material has not been seen for decades, and when it was available, it was not widely circulated and was only seen by a few people, particularly the explanations and theories which were written by Richard Shaver for science fiction fanzines of the 1940s. In addition, new transcripts of the complete text of material which only appeared in scanned text form before are now included here for ease of reading. Shaver's own peculiarities of writing style and syntax are faithfully transcribed. The contents of this book should interest anomalies researchers, Fortean paranormal enthusiasts, and investigators, science fiction historians, and fans, and all those interested in outsider art. Nothing as utterly dedicated to Shaver's own thoughts and artwork has ever been produced before. Thanks very much for your interest in this book and happy reading.

The Demon-Haunted World Carl Sagan, 2011-07-06 NEW YORK TIMES BESTSELLER From the renowned astronomer and author of *Cosmos* comes a powerful and stirring defense of informed rationality. The Washington Post Book World in a world where fake news stories and Internet conspiracy theories play to a disaffected American populace. LOS ANGELES TIMES BOOK PRIZE WINNER Glorious. A spirited defense of science. From the first page to the last, this book is a manifesto for clear thought. Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience, New Age thinking, and fundamentalist zealotry and the testable hypotheses of science? Casting a wide net through history and culture, Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. He examines and authoritatively debunks such celebrated fallacies as witchcraft, faith healings, demons, and UFOs. And yet disturbingly in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. **Platinum Pohl** Frederik Pohl, 2007-01-23 A new compilation of short fiction includes a never-before-published Heechee story and other science fiction tales. Galileo's Commandment Edmund Blair Bolles, 1999-10-18 A treasury of science writings drawn from a wide variety of disciplines and ranging throughout history from Herodotus's comments on the creation of Egypt made in 444 B.C. to George Smoot's search for the Big Bang in 1994. Spirit Possession around the World Joseph P. Laycock, 2015-05-26 This book provides a fascinating historical and cultural overview of traditional beliefs about spirit possession and exorcism around the world from Europe to Asia and the Middle East to the Americas.
