Robin Eh29c Manual:

Manual and List of Parts , 1977 Robin Program John F. Myers, James K. Luers, DAYTON UNIV OH RESEARCH INST., 1979 The Robin 77 or revised High Altitude Robin Program is specifically designed for computer reduction of Robin flights which attain an apogee of approximately 125 km and are tracked by an FPS 16 radar The program also provides accurate reduction for Robin flights attaining other apogees between 65 and 150 km If a passive sphere other than the 1 m Robin approximately 115 g is used reduction with this program is still possible There may be times however when drag coefficients are not available and thus density temperature and pressure cannot be computed The time of fall test used to determine sphere collapse is not used for spheres with dimensions that differ from the Robin At each second of flight the program calculates altitude wind components and direction density temperature and pressure the RMS noise error in winds density temperature and pressure and other balloon dynamics Author "HU" [*name of Engine Model*] *Manual* , 1994
