---

Dear [Recipient's Name],

I hope this letter finds you in good health and high spirits. My name is Darin Blanchard, and I am reaching out on behalf of [Your Organization's Name], a nonprofit organization dedicated to [Brief Description of Mission, e.g., "providing meals to underprivileged families in our community"].

In these challenging times, the demand for our services has significantly increased. We are committed to ensuring that no individual in our community goes hungry, but to achieve this, we need the support of generous donors like yourself.

We are currently organizing a food drive aimed at collecting non-perishable items to distribute to those in need, and we kindly request your participation. Your contribution of food items can make a substantial difference in the lives of many families. We are specifically in need of [List Specific Items Needed, e.g., "canned goods, dry pasta, rice, and baby food"], but any and all donations are greatly appreciated.

Your support will not only help us provide essential nutrition but also bring hope and a sense of community to those we serve. We believe in the power of community and the difference we can make when we come together for a common cause.

Should you choose to donate, please contact us at [Your Contact Information], and we will provide you with all the necessary details for drop-off or pick-up arrangements. Additionally, we would be more than happy to acknowledge your generous contribution in our upcoming newsletter and on our social media platforms, unless you prefer to remain anonymous.

Thank you for considering our request and for any support you can provide. Together, we can make a significant impact and help alleviate hunger in our community. We look forward to the possibility of partnering with you in this important cause.

Warmest regards,

**Unsafe at Any Meal** Dr. Renee Joy Dufault, 2017-05-04 Each year Americans consume hundreds of food products that contain truly dangerous compounds including heavy metals pesticides and other harmful additives with the blessing of the FDA Why is this happening and why haven t you heard about it In *Unsafe at Any Meal* Dr Renee Dufault former food investigator for the Food and Drug Administration provides the startling answers While at the FDA Dr Dufault discovered that mercury a highly toxic metal was contaminating the plumbing systems of many food manufacturing plants Upon further examination she discovered that the same mercury was also evident in a number of processed foods commonly sold in supermarkets When Dr Dufault revealed these disturbing findings to her superiors she was told to stop her investigation Her continued efforts to raise the issue always met with a dead end so she chose to take an early retirement from the FDA Dr Dufault then devoted her energy to making the public aware of the insidious dangers that contaminate our food In 2010 she founded an organization of scientists to study the scope of this problem and has published numerous research articles on the topic with little fanfare To expose what still seems to be a well kept secret by the FDA she has written *Unsafe at Any Meal* to provide consumers with the information they need to know The book begins with the author s story leading up to the creation

of this work It then describes the various toxic substances that are most commonly found in our food supply and explains how they affect your genes health and the surrounding environment After examining the Standard American Diet which is sorely lacking in disease preventing nutrients it discusses the country s trend toward consuming a skyrocketing amount of ingredients that can contain heavy metals It further shows how exposure to these heavy metals can contribute to conditions such as ADHD or autism Also included is a helpful guide to reading food labels recognizing misleading marketing tactics and knowing what to look for and what to look out for in the aisles of your grocery store Over fifty years ago Rachel Carson s book *Silent Spring* exposed the dangers of DDT in our food supply Unfortunately it seems that the problem of food contamination has actually become worse Backed by research and first hand experience Dr Dufault reveals how the FDA has failed us and outlines how you can protect yourself and your family by knowing what to avoid and by filling your kitchen with food that is clear of toxins
