

2 INTRODUCTION

Cognosec has conducted a security audit of the Enigma technology and the Cloak wallet application, as defined in "Scope". The results of the assessment are covered in this document. Actual security testing started on the 18th of December 2017 and was concluded on the 12th of January 2018. The objective of the assessment was to pinpoint security weaknesses and vulnerabilities, and to propose recommendations for their remediation.

Issues were discovered using targeted manual security testing procedures that were backed up with tools that allow automation of certain tasks. The identified issues were evaluated and prioritised according to their relative risk and measures for their remediation were proposed. The proposed countermeasures to reduce risk for identified security issues are presented in this security assessment report.

2.1 Background

Cloak went open source end of December 2017. In addition, the introduction of an improved version of the Enigma technology is planned that aims to provide an additional layer of anonymity.
