the traditional canons of assessment remain foundational and therefore necessary However they are not of themselves sufficient for quality education The book argues that assessment needs to be radically reconsidered in the context of unprecedented societal change Increasingly communities are segregating more by wealth with clear signs of social political economic and environmental instability These changes raise important issues relating to ethics and equity taken to be core dimensions in enabling the power of assessment to contribute to quality learning for all This book offers readers new knowledge about how assessment can be used to re engage learners across all phases of education Resources in Education ,1998-04 **Service-learning** National Center for Service-Learning (U.S.),1980
