

RevTech 110™

Looking for a powerful, dependable, beautiful motor to inject some fresh muscle into your ride? Look no further than the RevTech 110 from Custom Chrome. Our engineers and technicians spent thousands of hours developing the RevTech 110 with three major goals, high performance, exceptional reliability, and head-turning good looks.

Real world performance; it's what we all need and what defines the RevTech brand. That's why the RevTech 110 was engineered to make huge power, early and long. With an ideal bore and stroke combination of 4" by 4 3/8", we designed a wide power band for all occasions, whether ripping through the gears or grabbing a handful of pass, loaded down, riding two-up. With over 115 horsepower and 120 ft/lbs of torque, you'll have more than enough ponies for whatever type of riding you do.

Out on the streets it's far more fun to show off your ride than to explain why it's in the shop again. That's why we've built the RevTech 110 to be virtually indestructible. We began by designing new crankcases and then created a new manufacturing process to make them! Next, we developed flywheels and connecting rods forged from the most advanced steel available. Even our new crank pin is special, it's made of aircraft grade roller bearing material, we would tell you more but then we'd have to kill you!

If your bike hauls butt and doesn't break, why shouldn't it look great too? When designing the RevTech 110, we paid special attention to making it the best looking motor available. Check out the blind case bolts, flamelessly matched crankcase halves, and smooth crankcase-to-cylinder-base profile. And don't forget the john reed design, rocker boxes and the machined fin edges on the barrels and heads. Who else sweats the details like this?

This all adds up to what we believe is the best engine available for your ride. What makes it all the more sweet is that the price is right and we make it in three finishes to match your taste and your budget. So yank that anemic Evolution motor out of your frame and replace it with some real muscle, RevTech muscle.
