

INTRODUCTION

The rhinoceros is a large primitive looking mammal often referred to as our “modern dinosaur”. In recent decades rhinos have been relentlessly hunted to the point of near extinction. Since 1970 the world rhino population has declined by 90% with 5 species remaining in the world. All of which are endangered.

The demand for rhino horn, especially in Asian countries like Vietnam, have risen tremendously. This has now unfortunately caused the poaching of these species to accelerate to such an extent that the possibility of permanently losing them has become a reality that, not just South Africa, but the rest of the world faces as well.

Rhino Poaching Memorandum Practical:

Wildlife Crime Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2012-10-18 Wildlife legislation has become so complex that prosecutions fail and even specialist enforcement professionals struggle to implement it effectively Hundreds of birds of prey have been deliberately poisoned with substances such as carbofuran that have no legal use and the Government could easily make possession an offence The lack of sentencing guidelines on wildlife offences means that some offenders are being neither punished nor deterred in the courts The CPS is also failing to train its prosecutors to handle complex wildlife cases Furthermore the inflexible implementation in UK law of international agreements covering the trafficking of endangered species squanders limited resources The Government has maintained funding for specialist wildlife crime investigation and enforcement but this is provided on an ad hoc basis reducing operational effectiveness Funding provided to monitor wildlife crime on the internet was too short term to attract a suitably qualified individual to fill the post In 2004 the Committee called for a new database to record all wildlife crime but this has still not been introduced Internationally this report also examines how the rhino tiger and elephant are being driven to extinction by growing demand for illegal wildlife products in south east Asia and China The Government needs to exert robust diplomatic pressure in favour of the development and enforcement of wildlife law at the next CITES meeting in March 2013 In particular the Government should focus attention on the damaging effect of one off sales of impounded ivory which has been found to actually fuel demand for ivory products and seek an unequivocal international ban on all forms of ivory trade *Udjung Kulon* A. Hoogerwerf, 1970 [Taking Tourism to the Limits](#) Michelle Aicken, Stephen J. Page, Chris Ryan, 2006-08-11 The concept of margins and limits is often referred to within the tourism academic literature and includes subjects as diverse as carrying capacities peripheral economies technological advancement adventure tourism dark tourism and socially marginalized communities After identifying a number of ways in which limits might be defined *Taking Tourism to the Limits* explores concepts and challenges facing contemporary tourism in five main sections namely in tourism planning and management nature based tourism dark tourism adventure and sport tourism and the accommodation industry Drawing upon case studies current research and conceptualizations these different facets of the limits are each introduced by the editors with commentaries that seek to identify themes and current practice and thinking in the respective domains The picture that emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic International in scale the book links with its companion piece *Indigenous Tourism the commodification and management of culture* also published by Elsevier as an outcome of the very highly successful conference *Taking Tourism to the Limits* hosted by the University of Waikato Department of Tourism Management in 2003 2700+ *Mcqs Based On Current Affairs Events & Issues 2021* Aamir Bin Usman, 2021-01-19 2700 MCQs BASED ON CURRENT AFFAIRS EVENTS ISSUES 2021 by Aamir Bin Usman In this non fiction book Aamir Bin Usman

Jordaan, 2018 During the last ten years the rhino populations of South Africa have suffered under an intense poaching onslaught This onslaught has moved to the Free State Province of South Africa and there is a justified concern that its rhino populations are at risk To protect the rhinos in the Province a need exists to manage the risk of poaching through a practical rhino anti poaching model which can assist to protect them effectively This Rhino Anti Poaching Model can determine and predict a poaching risk can identify weaknesses can assist to address problem areas and will enable efficient monitoring It is imperative to know which rhino species occurred in the Free State Province in historical times to ensure that the correct rhino species is protected against the risk of poaching and that they be kept in a suitable habitat Nine farms in the Free State have rhino as a prefix in their names which may be an indication that rhino did occur in the Province Various historical photos and literature give a retrospective view and show that there was insufficient browsing vegetation for black rhinos to survive The occurrence of open grassland however suggests that white rhinos did occur in those specific areas during the time of the first pioneers During this study period a count of rhinos was done and currently there are 669 white rhinos and 11 black rhinos in the Province thus a total of 680 rhinos in the Free State Province The South African Constitution mandated the State to enforce measures that will ensure adequate environmental protection for the benefit of future generations The South African government promulgated a myriad of new environmental legislation Several international agreements were also introduced as enforcement tools to regulate rhinos The enforcement measures are noble but out of balance with many inspectors but too few law enforcement officials It also over regulates and ensnare officials in minor issues A brief discussion on the latest technological innovations gives insight to the purpose of its

development and effectiveness in combating rhino poaching There are currently no technical or strategic solutions to save rhinos from poaching therefore a combination of techniques is needed Although self manufactured unconventional devices seem to be more efficient to deceive poachers a combination with the latest technological equipment and conventional strategies might be the best solution to counter rhino poaching Free State rhino farmers own 90% of the Province s rhinos However these rhino farmers lack the appropriate security measures required to adequately protect their rhinos A questionnaire was developed and data were collected providing statistics on the current stance of security measures on rhino sites in the Province It showed that 80% of rhino poaching occurs in rhino camps bordering public roads 69% of the rhino sites located within 20km from the nearest town reported poaching and 77% of large rhino camps are prone to poaching incidents 57% of the respondents experienced rhino poaching on their sites Through the questionnaire it was gathered that rhino farmers in the Province are not vested in the concept of using trained rhino security A Production Loss Formula was constructed that calculates the production loss of a poached rhino

Operation Lock and the War on Rhino Poaching

John Hanks,2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression So argued Prince Bernhard of the Netherlands the founder president of the World Wide Fund for Nature WWF at a 1987 meeting with John Hanks conservation expert and WWF s head in Africa The result was Operation Lock a secret initiative funded by Prince Bernhard and staffed by former SAS operatives Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states Namibia Zambia Botswana Swaziland and Mozambique Its operatives planned to train game rangers to pose as rhino horn traders in order to entrap buyers and to expose the kingpins who were driving the trade It was a controversial approach all the more because it was working within apartheid South Africa in the late 1980s When the existence of the project was finally leaked WWF denied any involvement and John Hanks took the fall In Operation Lock and the War on Rhino Poaching John Hanks finally tells the story of these explosive events from 25 years ago As a leading international authority on conservation he also deals with the scourge of rhino poaching up to the present and gives powerful and controversial criticism of some of the current policies to curb poaching

Situational Prevention of Poaching Andrew Lemieux,2014-03-05 For centuries criminologists have looked for scientific ways to study understand and ultimately prevent crime In this volume a unique offense poaching is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence The data sources used range from publically available secondary data about animal populations to interviews with hunters to actual law enforcement data collected inside protected areas Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike which species they target and their modus operandi Collectively the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available While the theoretical grounding of this volume is drawn from criminology it is written for a broad audience of academics practitioners and those interested in wildlife conservation

Rhino Poaching Janina Naef,2016 Rhino horn is very popular in Asia as it is a status symbol and used as medicine That is one reason why the number of these animals is decreasing continuously In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos This Matura Paper deals with problems of rhino poaching in South Africa It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction Therefore 5 theses has been stated which consist of political financial protection measures and enlightenment of local and Asian people Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses The results prove the problems already stated If there are no changes in one of these problems the rhino doubtfully has a future *Conservation of Rhinos and Reauthorization of the Sikes Act* United States.
