Energy Innovation for the Twenty-First Century Jim Skea, Renée van Diemen, Matthew Hannon, Evangelos Gazis, Aidan Rhodes, 2019 This book addresses the question how effective are countries in promoting the innovation needed to facilitate an energy transition At the heart of the book is a set of empirical case studies covering supply and demand side technologies at different levels of maturity in a variety of countries The case studies are set within an analytical framework encompassing the functions of technological innovation systems and innovation metrics The book concludes with lessons and recommendations for effective policy intervention

Finance, Law, and the Courts Marco Lamandini, David Ramos Muñoz, 2023-11-09 Law and courts are often neglected in finance The discipline is so permeated by economic analysis the enforcement of its rules so based on regulatory authorities that it often seems more natural to speak of financial regulation rather than financial law de emphasizing the role of courts Authored by leading experts in commercial law Finance Law and the Courts goes beyond this limited perspective The book demonstrates that law and courts are essential in providing finance with the certainty it needs to operate and the elasticity it needs to evolve As explored in Part I of the book these benefits result from law s status as an interpretative construct formed by rules and principles a construct shaped by a need for consistency When principles collide courts are often called to solve hard cases and in doing so the Law of Finance evolves Examining such hard cases Parts II and III analyze courts roles in influencing finance s key concepts and principles For Public Law this includes the impact of sovereign immunity separation of powers or individual rights on the justiciability of financial acts central banks mandates and the interplay between regulatory concepts and fundamental rights For Private Law these include the foundations of liability for misstatements the validity and interpretation of financial contracts and creditor creditor conflict The book further explores the interplay between specialist and generalist courts and other bodies in Part IV concluding with a case for limited specialization of finance justice in the EU Offering a comprehensive legal treatment of finance s regulatory sources this book is an unparalleled resource for law academics practitioners and policymakers seeking to better understand the complex financial cases that they may encounter
