Main Features

- 60-watt output, high-performance, DHT guitar amp with built-in, 30-w (12-inch) speaker
- Offers four types of COSM amps, including realistic modeling of some of the most popular guitar amps and two original amp types, "ACOUSTIC" and "DYNA AMP". The newly developed "DYNA AMP" lets you achieve previously unperformed levels of tonal variation based on your picking dynamics, for whole new levels of expression.
- Compared to Digital Based Modeling (COSM) is Roland's innovative and powerful sound modeling technology. COSM analyzes the many factors that make up the original sound, such as the electrical and physical characteristics of the original, and then produces a digital model that can reproduce the same sound.
- Channel can be switched between "FC CLEAN" and "LEAD". Channel switching can be done via foot switch (optional).
- In addition to an easy-to-use, 3-band equalizer, the CUBE-60 also features a PRESENCE knob, which you can use to create a wide variety of precisely defined sounds.
- Comes equipped with four effects types, chorus, flanger, phaser, and tremolo, along with an independent system with the basic delay and reverb effects. You can also use foot switches (optional) to switch these effects on and off.
- Equipped with a convenient "RECOVERING OUT jack" handy for use in recording. This output also functions as a headphone jack.

Also features LINE OUT, TUNER OUT, and EXT SPEAKER outs. These outputs can be used for all kinds of performances, from recording to live gigs.
