## **Institutional Review Board Decision Letter**

The Institutional Review Board (IRB) has completed its review of the following project:

Principal Investigator:

Project Title:

Funding Agency:

Proposal Number (if applicable):

The determination of the board is that:

\_\_\_\_ This project **complies** with the institution's Policy and Procedures regarding use of human subjects in a grant-funded research project (Common Rule Section 1.01 subsection b). The project may be conducted as planned subject to continuing review as outlined in the board's procedures.

\_\_\_\_ This project **does not comply** with the institution's Policy and Procedures regarding use of human subjects in a grant-funded research project. Concerns of the IRB are outlined in an attached document. The Principal Investigator has the right to modify and re-submit the proposal for another review.

## **Sample Submission Letter Liberty Institutional Review Board:**

Principles of Exposure Measurement in Epidemiology Emily White, Bruce K Armstrong, Rodolfo Saracci, 2008-02-28 The second edition of this internationally acclaimed title is the ideal handbook for those involved in conducting epidemiological research. The objective of most epidemiological studies is to relate exposure to putative causal agents to the occurrence of a particular disease. The achievement of this objective depends critically on accurate measurement of exposure. This book reviews principles and techniques that can be applied to measuring a wide range of exposures including demographic, behavioral, medical, genetic, and environmental factors. The book covers questionnaire design, conducting personal interviews, abstracting information from medical records, use of proxy respondents, and measurements from human specimens and in the environment. It gives a comprehensive account of measurement error and the estimation of its effects and the design, analysis, and interpretation of validity and reliability studies. Emphasis is given to the ways in which the validity of measurements can be increased. Techniques to maximize participation of subjects in epidemiological studies are discussed, and ethical issues relevant to exposure measurement are outlined.
