

Child Observation

Introduction

Child observation can be defined as the general assessment of a child's behavior and character from the earliest stages to the adult age. Children are observed purposefully for the developmental progress. The observations and assessment take place in a number of ways; namely: the normal activities carried out by the children, the language the children use to communicate, the interactions of children with the others (social interaction), and learning that they get when they do samples of work. In their book entitled *The Child's World*, E. Papalia and Ruth Duskin Feldman have described the activities related to the child conception and all stages leading to the development of a mature child. In this essay, the focus shall be on the development of the child after the birth and into the early childhood, as well as determining the observation criteria of the child. The essay shall also cover the wide range of the development patterns ranging from the psychological, physical, cognitive, and psychosocial development. The essay shall also cover the benefits or significance of child observation, since the early childhood in determining the character of a child.

There is always a reason why a child is under observation. According to Papalia et al. (2007), assessment is done in order to help in observing the development of the child with reference to the language. This helps in planning the best ways the parents can help to extend the language knowledge. The assessment is also done in an effort to observe the physical development of the child. The physical development is what later develops to the skills the child possesses. The physical development goes
