2b. Content of A Level in Chemistry A (H432)

The A Level in Chemistry A specification content is divided into six teaching modules and each module is further divided into key topics.

Each module is introduced with a summary of the chemistry it covers and each topic is also introduced with a short summary text. The module content is then divided into two columns: **learning objectives** and **additional guidance**.

The learning objectives may all be assessed in the examinations (with the exception of some of the skills in module 1.1 which will be assessed directly through the Practical Endorsement). The additional guidance column is included to provide further advice on delivery and the expected skills required from learners.

References to *refer* (Section 5) are included in the guidance to highlight opportunities to encourage a wider understanding of science.

The mathematical requirements in Section 5 are also referenced by the profile of the line the mathematical skills required for A Level Chemistry (as examples of chemistry content where those mathematical skills could be linked to learning).

The specification has been designed to be compatible with the standards of A Level in Chemistry A qualifications. The first four modules cover the A Level in Chemistry A content and learners studying the A Level continue with the content of modules 5 and 6, that separately involving Practical Endorsement skills also form part of the full A Level course (Module 1-2).

A summary of the content for the A Level course is as follows:

Module 1 – Development of practical skills in

- Acid-base and redox reactions
- Electrons, bonding and structure
- Module 2 – Periodic table and energy**
