According to medical experts, obesity occurs when the BMI exceeds 30kg/m^2 . While this is the case, people who have a BMI of between 25 and 29 are considered to be overweight. Obesity has a wide-range of negative effects, which may be a threat to the life of a person.

As a result, most of these people lead a sedentary lifestyle, which is usually characterized by minimal or no movement. In such scenarios, victims prefer being helped doing basic activities, including moving from one point to another.

Moreover, laziness makes one to be inactive and unproductive. For example, a student who is obese may find it hard to attend to his or her homework and class
