Dakers, 2022-11-21 Although technology education is in desperate need of reform the new refuses to be born Despite the introduction of technological literacy the evolving merger with science mathematics and engineering STEM and even a proposed merger between STEM and the arts STEAM nothing has changed The subject continues to be a craft based vocationally orientated subject Human beings have always had a relationship with technology

but never before has the progression of technological development had such an impact on the environment one which has led to the birth of the Anthropocene This poses the greatest existential threat ever known to the future of human existence Those in power continue to turn a blind eye to this threat Moreover technology education today does not reflect issues relating to our technologically textured lifeworld Given that it is the young who will inherit this potentially dystopic future they must be given a voice one in which they can reimagine their futures in a sustainable way This book explores the development of ethnotechnological literacy as delivered by a radical new nomadic pedagogy inspired by the philosophy of Deleuze and Guattari one that can enable these voices to be expressed and more importantly to be heard **Aiming for an A in A-level**
