Earthscore Donald W. Lotter,1996-10 Protecting Earth's Land Valerie Rapp,2015-08-01 Nearly all living things depend on Earth s land and its resources to survive But did you know that people do many things that hurt the land The damage sometimes destroys forests which are home to diverse ecosystems and are important in producing oxygen and water And in many parts of the world damaged land produces less food less wood and less of many things that people need We must join together in the quest to find better ways to use and take care of Earth s land With engaging text and eye catching images plus a special Going Green section this book tells you all about Earth s land and what you can do to protect it

Save Our Planet Diane Maceachern,1991-12-16 Even though you are just one person who may have never done anything extraordinary before you can change the world Did you know Every day the Earth receives enough solar energy to heat every home in the world for one year free It takes twenty trees to keep one baby in disposable diapers for two years Of the billion pounds of pesticides used each year in the U S less than one percent reaches a pest The average American throws out their own weight in packaging every month If your office recycled one ton of the paper it uses you d be saving seventeen trees and keeping sixty pounds of air pollution out of the sky There are hundreds of tips in this book but don t let the numbers throw you Even if you follow just one or two of the suggestions provided tangible progress will be made towards restoring vitality to the Earth

The Green Fallacy Nick Johanson,2009-12 In the vast world of environmentalism misconceptions are infinitely abundant The Green Fallacy is about using logic and common sense to tackle the many fallacies associated with manmade global warming and environmentalism These days environmentalism is more about emotion than truth Rather than using supporting evidence environmentalists relentlessly appeal to the public s emotions trying to lure you in with pictures of cute fuzzy polar bears and evil devastating hurricanes In The Green Fallacy we will take a long hard look at the many holes in the issue of manmade global warming Nick Johanson presents arguments that are contrary to the mainstream arguments of the day and asks questions that most people currently in positions of authority often avoid or fail to answer altogether Are

hurricanes really getting more frequent Are polar bears really dying Is carbon dioxide really a pollutant These are just a few of the many questions we will delve into in The Green Fallacy What is a Fallacy According to Dictionary com fallacy can be defined as a deceptive misleading or false notion A fallacy is basically the exact opposite of truth Truth is verifiable and indisputable while a fallacy can be proven wrong by simply looking at the supporting evidence or lack thereof Nick Johanson currently resides in a small town in Washington State and is actively working his way through college in Oregon majoring in Radio Broadcasting He plans to go into Voiceover Acting and maybe one day have his own talk radio show He enjoys Scuba Diving talking politics chocolate milk and exercising his 2nd Amendment rights as an American citizen **Lions 323H2 District Directory** MJF Lion Adv.
