Saxon Math Course Teacher S Edition:

How Chinese Teach Mathematics and Improve Teaching Yeping Li, Rongjin Huang, 2013 *How Chinese Teach Mathematics and Improve Teaching* builds upon existing studies to examine mathematics classroom instruction in China. It combines contributions from Chinese scholars with commentary from key Western scholars to offer a truly systematic examination of some important and distinctive features of mathematics classroom instruction. Viewing classroom instruction as part of teachers' instructional practices, this book goes beyond teachers in classroom instructional practice by also examining Chinese teachers' approaches and practices in developing and improving teaching. Through this unique approach, *How Chinese Teach Mathematics and Improve Teaching* expands and unpacks the otherwise fragmented knowledge about Chinese practices in developing and carrying out mathematics classroom instruction.

Urban Education, Approaches that Work

United States. Congress. House. Committee on Small Business. Subcommittee on Empowerment, 1998

A hearing was held before the Subcommittee on Empowerment of the House Committee on Small Business to build a record of a lot of things that are working in urban education in high risk zones. In his opening remarks, Representative Souder (Indiana) noted that there is no question but that the best way to combat unemployment and the problems that flow from it is to provide people with the best possible training. For most of the work force, training begins in school. Strengthening basic skills is not exclusively an urban problem, but it is one that is of particular concern in the cities. The purpose of this hearing was not why so many schools are failing, but why some succeed. Five educators who run successful urban schools appeared at the hearing to explain why their schools work. Thaddeus S. Lott Sr., principal of a charter school district in Houston, Texas, described the experiences of a successful elementary school that used an intensive reading program beginning in kindergarten and direct instruction to raise academic achievement. Vera White, principal of a junior high school in the District of Columbia, achieved academic success with a program that focused on student learning and high expectations and that was supported in a partnership with COMSAT. Comments by hearing participants follow these statements. In the second panel discussion of the hearing, Oscar J. Underwood, headmaster of a Christian college preparatory school in Indiana, spoke about the importance of the educational environment and teacher attitudes. Leah White, administrator of an urban Christian school in Maryland, noted the
