- Addition and Subtraction

Types of number

Integer: a 'whole' number
Factors: the divisors of an integer
• Factors of 12 are 1, 2, 3, 4, 6, 12
Multiples: a 'times table' for an integer (with infinite multiples)
• Multiples of 12 are 12, 24, 36, ...
Prime number: an integer which has exactly two factors (1 and the number itself). Note it is not a prime number.

Units

Highest Common Factor (HCF)
• Factors of 6 are 1, 2, 3, 6
Factors of 9 are 1, 3, 9
HCF of 6 and 9 is 3

Lowest Common Multiple (LCM)

• Multiples of 6 are 6, 12, 18, 24, ...
Multiples of 9 are 9, 18, 27, 36, ...
LCM of 6 and 9 is 18

Power notation

Write a number as a product of its prime factors, and follow for repeated factors.
• $120 = 2 \times 2 \times 2 \times 3 \times 5$

Indices and roots

Special indices for any number a
 $a^0 = 1$
 $a^{-1} = \frac{1}{a}$
 $a^{\frac{1}{2}} = \sqrt{a}$

Ordering with fractions

Adding or subtracting fractions, use a common denominator.
• $\frac{1}{2} + \frac{1}{3} = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$

Multiplying fractions

Multiplying fractions: multiply numerators and denominators.
• $\frac{1}{2} \times \frac{1}{3} = \frac{1 \times 1}{2 \times 3} = \frac{1}{6}$

Dividing fractions

Dividing fractions: 'flip' the second fraction, then multiply.
• $\frac{1}{2} \div \frac{1}{3} = \frac{1}{2} \times \frac{3}{1} = \frac{3}{2}$

Proportion notation

Fraction in numerator = denominator
• $\frac{1}{2} \text{ of } 10 = \frac{1}{2} \times 10 = 5$

Area of a rectangle

Use the area of a rectangle to find the area of a shape.
• $10 \times 5 = 50$

Area of a triangle

Use the area of a triangle to find the area of a shape.
• $\frac{1}{2} \times 10 \times 5 = 25$

Area of a circle

Use the area of a circle to find the area of a shape.
• $\pi r^2 = \pi \times 5^2 = 25\pi$

Area of a sector

Use the area of a sector to find the area of a shape.
• $\frac{\theta}{360} \times \pi r^2 = \frac{60}{360} \times \pi \times 5^2 = \frac{25\pi}{6}$

[A Biography of the Pixel](#) Alvy Ray Smith, 2021-08-03 The pixel as the organizing principle of all pictures from cave paintings to Toy Story The Great Digital Convergence of all media types into one universal digital medium occurred with little fanfare at the recent turn of the millennium The bit became the universal medium and the pixel a particular packaging of bits conquered the world Henceforward nearly every picture in the world would be composed of pixels cell phone pictures app interfaces Mars Rover transmissions book illustrations videogames In A Biography of the Pixel Pixar cofounder Alvy Ray Smith argues that the pixel is the organizing principle of most modern media and he presents a few simple but profound ideas that unify the dazzling varieties of digital image making Smith's story of the pixel's development begins with Fourier waves proceeds through Turing machines and ends with the first digital movies from Pixar DreamWorks and Blue Sky Today almost all the pictures we encounter are digital mediated by the pixel and irretrievably separated from their media museums and kindergartens are

two of the last outposts of the analog Smith explains engagingly and accessibly how pictures composed of invisible stuff become visible that is how digital pixels convert to analog display elements Taking the special case of digital movies to represent all of Digital Light his term for pictures constructed of pixels and drawing on his decades of work in the field Smith approaches his subject from multiple angles art technology entertainment business and history A Biography of the Pixel is essential reading for anyone who has watched a video on a cell phone played a videogame or seen a movie 400 pages of annotations prepared by the author and available online provide an invaluable resource for readers

Reasoning in Measurement Nicola Mößner, Alfred Nordmann, 2017-03-16 This collection offers a new understanding of the epistemology of measurement The interdisciplinary volume explores how measurements are produced for example in astronomy and seismology in studies of human sexuality and ecology in brain imaging and intelligence testing It considers photography as a measurement technology and Henry David Thoreau's poetic measures as closing the gap between mind and world By focusing on measurements as the hard won results of conceptual as well as technical operations the authors of the book no longer presuppose that measurement is always and exclusively a means of representing some feature of a target object or entity Measurement also provides knowledge about the degree to which things have been standardized or harmonized it is an indicator of how closely human practices are attuned to each other and the world

Patent Policy and Innovation Hazel V. J. Moir, 2013-01-01 Just how inventive are inventions More to the point just how inventive are the inventions covered by patents Not very according to Hazel Moir and there is no reason to doubt her conclusions She has spent years in painstakingly analysis of dozens of business method patents in Australia and elsewhere She finds they are no more than strategic devices intended to annoy and disrupt commercial competition and confuse the market Hazel Moir is a patent expert beholden to no patent theory and no patent interests In consequence her research is fresh and inspired Her conclusion that patents describe and protect obvious combinations of old ideas and trivial variations may not be confined to business methods It is a conclusion that demands the consideration of policymakers Stuart Macdonald Aalto University Helsinki Finland This book presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that patents have spread geographically and technologically with

increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US Hazel Moir s book deserves to become a classic Between its covers one will find writing of great clarity and data that reveal the real world costs of the patent system After reading Moir s analysis one wonders what the actual social benefits of the patent system might be This is evidence based analysis at its best Peter Drahos Australian National University and Queen Mary University of London UK This book presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that despite the intuitions of economists social scientists lawyers judges and even some inventors patents have spread geographically and technologically with increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US This empirical study uses a scientifically selected sample of patents to assess patent quality The careful evaluation of the assumptions in alternative economic theories about the generation and diffusion of new knowledge demonstrates that the height of the inventive step is critical to effective and efficient patent policy The book provides a practical introduction to the policy rules affecting the grant of patents particularly the rules making the inventive step so low It also offers insights into interactions between examiners and applicants during the patent application process Finally the book compares how the rules about inventiveness operate in the USPTO the EPO and the Australian Patent Office gives new insights into business method patenting and offers suggestions for raising the height of the inventive step Patent Policy and Innovation will appeal to academics researching in the patent field economists innovation and industry policy advisors patent policy makers NGO policy advisors and patent practitioners Discrete Geometry for Computer Imagery Rocio Gonzalez Diaz, Maria Jose Jimenez, Belen Garfia Medrano, 2013-03-17 This book constitutes the thoroughly refereed proceedings of the 17th International Conference on Discrete Geometry for Computer Imagery DGCI 2013 held in Seville Spain in March 2013 The 34 revised full papers presented were carefully selected from 56 submissions and focus on geometric transforms discrete and combinatorial tools for image segmentation and analysis discrete and combinatorial topology discrete shape representation recognition and analysis models for discrete geometry morphological analysis and discrete tomography **Brain Tumor Segmentation using hybrid of both Netrosopic Modified Nonlocal Fuzzy C-mean and Modified Level sets** Shaima Elnazer, Mohamed Morsy, Mohy Eldin A. Abo-Elsooud , Abstract an improved segmentation approach based on Neutrosophic sets NS and Modified Non local Fuzzy c mean clustering NLFCM is proposed The brain tumor MRI image is transformed into NS domain which is described using three subsets namely the percentage of truth in a subset T% the percentage of indeterminacy in a subset I% and the percentage of

falsity in a subset $F\%$ The entropy in NS is defined and employed to evaluate the indeterminacy
