Trigo-Rodríguez, Maria Gritsevich, Herbert Palme, 2016-12-19 This volume is a compilation of the research presented at the International Asteroid Day workshop which was celebrated at Barcelona on June 30th 2015 The proceedings discuss the beginning of a new era in the study and exploration of the solar system s minor bodies International Asteroid Day commemorates the Tunguska event of June 30th 1908 The workshop s goal was to promote the importance of dealing proactively with impact hazards from space Multidisciplinary experts contributed to this discussion by describing the nature of comets and asteroids along with their offspring meteoroids New missions to return material samples of asteroids back to Earth such as Osiris REx and Hayabusa 2

as well as projects like AIM and DART which will test impact deflection techniques for Potentially Hazardous Asteroids encounters were also covered The proceedings include both an outreach level to popularize impact hazards and a scientific character which covers the latest knowledge on these topics as well as offering proposals of promising new techniques that will help gain new insights of the properties of these challenging bodies by studying meteoroids and meteorites Asteroids comets meteoroids and meteorites are introduced with descriptions of their nature origin and solar system pathways

*An Introduction to Comets* Nicolas Thomas, 2020-12-15 Written by a leading expert on comets this textbook is divided into seven main elements with a view to allowing advanced students to appreciate the interconnections between the different elements The author opens with a brief introductory segment on the motivation for studying comets and the overall scope of the book The first chapter describes fundamental aspects most usually addressed by ground based observation The author then looks at the basic physical phenomena in four separate chapters addressing the nucleus the emitted gas the emitted dust and the solar wind interaction Each chapter introduces the basic physics and chemistry but then new specific measurements by Rosetta instruments at comet Churyumov Gerasimenko are brought in A concerted effort has been made to distinguish between established fact and conjecture Deviations and inconsistencies are brought out and their significance explained Links to previous observations of comets Tempel 1 Wild 2 Hartley 2 Halley and others are made The author then closes with three smaller chapters on related objects the loss of comets and prospects for future exploration This textbook includes over 275 graphics and figures most of which are original Thorough explanations and derivations are included throughout the chapters The text is therefore designed to support MSc students and new PhD students in the field wanting to gain a solid overview of the state of the art
