J. Wright,H. C. Euler,1977 **Fundamental Questions in Astrophysics: Guidelines for Future UV Observatories** Ana I. Gómez de Castro,Willem Wamsteker,2007-01-30 Modern astrophysics is a mature science that has evolved from its early phase of discovery and classification to a physics oriented discipline focused on finding answers to fundamental problems ranging from cosmology to the origin and diversity of life sustainable systems in the Universe For this very reason progress of modern astrophysics requires access to the electromagnetic spectrum in the broadest energy range The Ultraviolet is a fundamental energy domain since it is one of the most powerful tools to study plasmas at temperatures in the 3 000 300 000 K range as well as electronic transitions of the most abundant molecules in the Universe Moreover the UV radiation field is a powerful astrochemical and photoionizing agent This book describes the fundamental problems in modern astrophysics that cannot progress without easy and wide spread access to modern UV instrumentation *Volcanism and Evolution of the African Lithosphere* Luigi Beccaluva,Gianluca Bianchini,B. Hydrothermal Processes Above the Yellowstone Magma Chamber Lisa A. Morgan, Wayne C. Shanks, Kenneth Lee

Pierce, 2009-01-01 Home to more than 10 000 thermal features Yellowstone has experienced over 20 large hydrothermal explosions producing craters from 100 to over 2500 meters in diameter during the past 16 000 years Using new mapping sampling and analysis techniques this volume documents a broad spectrum of ages and geologic settings for these events and considers additional processes and alternative triggering mechanisms that have not been explored in previous studies Although large hydrothermal explosions are rare on the human time scale the potential for future explosions in Yellowstone is not insignificant and events large enough to create a 100 m wide crater might be expected every 200 years This work presents information useful for determining the timing distribution and possible causes of these events in Yellowstone which will aid in the planning of monitoring strategies and the anticipation of hydrothermal explosions Publisher s description
