

Health Effects of Secondhand Smoke

Public Health Department

- For 50 years the Surgeon General's reports on smoking and health have provided a critical scientific foundation for public health action directed at reducing tobacco use and preventing tobacco-related disease and premature death.
- According to the 2014 Surgeon General's Report, exposure to secondhand tobacco smoke has been causally linked to cancer, respiratory, and cardiovascular diseases, and to adverse effects on the health of infants and children.
- In addition to causing multiple diseases, cigarette smoking has many adverse effects on the body, such as causing inflammation and impairing immune function.

Preventing Tobacco Use Among Youth and Young Adults ,2012 This booklet for schools medical personnel and parents contains highlights from the 2012 Surgeon General s report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 25 The report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social environmental advertising and marketing influences that encourage youth and young adults to initiate and sustain tobacco use This is the first time tobacco data on young adults as a discrete population have been explored in detail The report also highlights successful strategies to prevent young people from using tobacco **Reducing the Health Consequences of Smoking** United States. Public Health Service. Office of the Surgeon General, 1989 **State and Local Legislative Action to Reduce Tobacco Use** Donald R. Shopland, 2000-11 Sections of the report include the role of public policy change in tobacco control current state of the science state laws and local ordinances to reduce tobacco use clean indoor air provisions youth access provisions and advertising restrictions workplace smoking restrictions rules about smoking in the home and attitudes toward smoking restrictions in public places national and state specific estimates from the current population survey and model ordinances Summary of State tobacco control laws Charts and tables **The Health Consequences of Smoking** United States. Public Health Service. Office of the Surgeon General, 2014 Fifty years have passed since publication of the landmark report of the Surgeon General s Advisory Committee on smoking and health This report highlights both the dramatic progress our nation has made reducing tobacco use and the continuing burden of disease and death caused by smoking The prevalence of current cigarette smoking among adults has declined from 42% in 1965 to 18% in 2012 However more than 42 million Americans still smoke Tobacco has killed more than 20 million people prematurely since the first Surgeon General s report in 1964 The findings in this report show that the decline in the prevalence of smoking has slowed in recent years and that burden of smoking attributable mortality is expected to remain at high and unacceptable levels for decades to come unless urgent action is taken In 2012 the Centers for Disease Control and Prevention CDC launched the first ever paid national tobacco education campaign Tips From Former Smokers Tips to raise awareness of the harms to health caused by smoking encourage smokers to quit and encourage nonsmokers to protect themselves and their families from exposure to secondhand smoke While we have made tremendous progress over the past 50 years sustained and comprehensive efforts are needed to prevent more people from having to suffer the pain disability disfigurement and death that smoking causes Most Americans who have ever smoked have already quit and most smokers

who still smoke want to quit If we continue to implement tobacco prevention and cessation strategies that have proven effective in reducing tobacco use people throughout our country will live longer healthier more productive lives
