Discussion:

- State the law of reflection in the space below.

Consider the diagram at the right in answering the next three questions.

- The angle of incidence is denoted by angle _____.
- The angle of reflection is denoted by angle _____.
- If an incident ray of light makes an angle of 35° with the mirror surface then the angle of reflection is _____°.
- Why do windows of distant houses appear to reflect the sun only when rising or setting? Explain in words. Use the diagram to help, drawing appropriate light rays on the diagram.

- Use the law of reflection and the embedded protractor in order to draw the reflected ray associated with the given incident ray for the following plane mirror situations. (Markings are provided at 15° increments.)

- Now for a research question:

In this unit we will often discuss how the reflection of light from a mirror results in the formation of an image. The term image as used here has an obvious context - physics. But the term image has numerous other contexts - psychology (a positive self-*image*), religion (created in God's *image*), business (the company's *image*), medicine (an x-ray *image*), etc. Your research question involves finding a dictionary and looking up the definition of the word image. Write down several meaningful definitions from several contexts in the spaces below. (If you do not have a dictionary at home then you can use dictionary.com or wikipedia.org.)
