Registration Dates At Tut 2016:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double-speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

Introduction to Middleware Letha Hughes Etzkorn, 2017-06-12 A stereotype of computer science textbooks is that they are dry, boring and sometimes even intimidating. As a result they turn students' interests off from the subject matter instead of enticing them into it. This textbook is the opposite of such a stereotype. The author presents the subject matter in a refreshing story-telling style and aims to bring the Internet generation of students closer to her stories. Yingcai Xiao, The University of Akron. Introduction to Middleware: Web Services, Object Components and Cloud Computing provides a comparison of different middleware technologies and the overarching middleware concepts they are based on. The various major paradigms of middleware are introduced and their pros and cons are discussed. This includes modern cloud interfaces including the utility of Service Oriented Architectures. The text discusses pros and cons of RESTful vs non-RESTful web services and also compares these to older but still heavily used distributed object component middleware. The text guides readers to select an appropriate middleware technology to use for any given task and to learn new middleware technologies as they appear over time without being greatly overwhelmed by any new concept. The book begins with an introduction to different distributed computing paradigms and a review of the different kinds of architectures, architectural styles, patterns and properties that various researchers have used in the past to examine distributed applications and determine the quality of distributed applications. Then it includes appropriate background material in networking and the web security and encoding necessary to understand detailed discussion in this area. The major middleware paradigms are compared and a comparison methodology is developed. Readers will learn how to

select a paradigm and technology for a particular task after reading this text Detailed middleware technology review sections allow students or industry practitioners working to expand their knowledge to achieve practical skills based on real projects so as to become well functional in that technology in industry Major technologies examined include RESTful web services RESTful cloud interfaces such as OpenStack AWS EC2 interface CloudStack AJAX JAX RS ASP NET MVC and ASP NET Core non RESTful SOAP and WSDL based web services JAX WS Windows Communication Foundation distributed objects components Enterprise Java Beans NET Remoting CORBA The book presents two projects that can be used to illustrate the practical use of middleware and provides implementations of these projects over different technologies This versatile and class tested textbook is suitable depending on chapters selected for undergraduate or first year graduate courses on client server architectures middleware and cloud computing web services and web programming

Pelliccio, Sara Peluso, Silvia Petrucci, Maria Rita Pizzurro, Paola Puma, Antonella Salucci, Salvatore Santuccio, Marcello Scalzo, Francesco Scirè, Filippo Terranova, Lycia Trapani, Maurizio Unali, Marcello Vannucchi, Uliva Velo, Giuseppe Verde, 2016-02-07T00:00:00+01:00 Il progetto nazionale di ricerca Prin 2004 sui Metodi e tecniche integrate di rilevamento per la realizzazione di Modelli Virtuali dell'Architettura e della Città ha concluso il suo percorso e oggi i risultati vengono resi pubblici con questo volume. La disponibilità di molti dati sotto forma digitale ha determinato l'integrazione tra le diverse metodologie di rilevamento sia innovative che tradizionali il che costituisce un notevole progresso per giungere ad una conoscenza profonda e globale dell'architettura e della città. Negli ultimi quaranta anni alle tradizionali tecniche di rilevamento architettonico che si erano sostanzialmente mantenute immutate per molti secoli si sono aggiunte in modo imprevedibile e con sempre maggiore rapidità una serie di nuove metodologie. L'avvento negli anni ottanta dell'informatica ha determinato mutamenti radicali nella disciplina dapprima investendo la stessa fotogrammetria trasformandola da analogica a digitale e successivamente aprendo le porte intorno alla metà degli anni 90 alla nuova metodologia basata sui laser scanner 3D. Mario Docci, professore ordinario di Rilevamento dell'architettura, presiede la Facoltà di Architettura dell'Università di Roma La Sapienza dal 1988 al 2000, docente presso la scuola di specializzazione in Restauro dei Monumenti nella stessa università, Direttore del Dipartimento RADAAR, Rilievo, Analisi e Disegno dell'Ambiente e dell'Architettura e membro del Comitato Tecnico Scientifico per la Qualità dell'architettura e dell'arte Contemporanea, Ministero dei Beni e delle Attività Culturali. Eduskunta, 2014. *The Eleventh Avatar* Nandita and Ramesh, 2016-04-01 This collection of stories is a work of fiction which however depicts the reality of life in India. The author has highlighted what she feels are facets of Indian life which are blots on our national character. She hopes that these stories will influence the readers to fight against the evils of our society which are not intrinsic but have been created by greedy, corrupt and immoral people. The Eleventh Avatar brings out the changes and transformations of Indian society as seen through the eyes of Lord Vishnu as he journeys through the erstwhile Bharatha Desham after a span of few thousands of years. It talks about his delight at some of the positive changes and at the same time his sorrow at the degradation of the moral fibre of the Indian society. The Girl on a Cycle is a romantic story where the author brings out her conviction that the most important emotion is kindness. Every act of kindness has ripple effects. If kindness becomes the norm rather than the exception then we could bid adieu to strife. *Revista española de salud pública*, 2010-07. *Intelligenza artificiale e diritto d'impresa* Niccolò Abriani, Mia Callegari, Eva Desana, Claudia Sandei, 2022-10-26 L'ebook approfondisce il tema dell'uso delle tecnologie di intelligenza artificiale nell'ambito dell'attività d'impresa e i suoi impatti sul diritto societario. Gli articoli affrontano i diversi profili dell'attività d'impresa nel cui esercizio coinvolta l'UE. A partire da temi più generali e di diritto dell'Unione Europea per analizzare le questioni di grande rilievo e complessità del diritto societario con particolare attenzione alla

La riflessione verte anche sugli interrogativi che la diffusione degli strumenti di IA pone a proposito del top management e delle c.d. discriminazioni algoritmiche nel settore finanziario, il c.d. FinTech e in quello della corporate governance, le c.d. CorpTech, nonché sul ruolo dell'intelligenza artificiale nel contesto delle regole che attengono alla diffusione al mercato delle informazioni privilegiate da parte degli emittenti quotati, c.d. informazioni price sensitive.
