Machine Learning from Weak Supervision Masashi Sugiyama, Han Bao, Takashi Ishida, Nan Lu, Tomoya Sakai, 2022-08-23 Fundamental theory and practical algorithms of weakly supervised classification emphasizing an approach based on empirical risk minimization Standard machine learning techniques require large amounts of labeled data to work well When we apply machine learning to problems in the physical world however it is extremely difficult to collect such quantities of labeled data In this book Masashi Sugiyama Han Bao Takashi Ishida Nan Lu Tomoya Sakai and Gang Niu present theory and algorithms for weakly supervised learning a paradigm of machine learning from weakly labeled data Emphasizing an approach based on empirical risk minimization and drawing on state of the art research in weakly supervised

learning the book provides both the fundamentals of the field and the advanced mathematical theories underlying them It can be used as a reference for practitioners and researchers and in the classroom The book first mathematically formulates classification problems defines common notations and reviews various algorithms for supervised binary and multiclass classification It then explores problems of binary weakly supervised classification including positive unlabeled PU classification positive negative unlabeled PNU classification and unlabeled unlabeled UU classification It then turns to multiclass classification discussing complementary label CL classification and partial label PL classification Finally the book addresses more advanced issues including a family of correction methods to improve the generalization performance of weakly supervised learning and the problem of class prior estimation *Foundation of IT and MS Office 2000* Mr. Rohit Manglik,2024-03-30 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels
