distress during the testing session is only a minimal part compared to the stress lived outside of the testing session which is prolonged and continuous Analogously liquid rewards commonly rely on a previous water restriction protocol to use thirst as motivation Animal stress is not only an ethical issue per se but also an important factor potentially impacting on the reliability and reproducibility of experimental results **Selected Water Resources Abstracts** ,1988 **Monthly Catalog of United States Government Publications** ,1993 Research in Education ,1971 **Technical Abstract Bulletin** ,1981 Inventory of Federal Energy-related Environment and Safety Research for ... ,1979 *Inventory of Federal Energy-related Environment and Safety Research for FY 1978* ,1979 **Inventory of Federal Energy-related Environment and Safety Research for FY 1978: Project listings and indexes** ,1979 *Neurological Research* National Institute of Neurological Diseases and Stroke,1969
