Neuroimaging and Psychosocial

Addiction Treatment Sarah W. Feldstein Ewing, Katie Witkiewitz, Francesca M. Filbey, 2015-06-23 Using an innovative translational approach between the work of experimental scientists and clinical practitioners this book addresses the current modest understanding of how and why addiction treatment works Through bridging this gap it provides a critical insight into why people react as they do in the context of addiction treatment

Nuclear Functions in Plant Transcription, Signaling and Development Olga Pontes, Hailing Jin, 2015-06-03 The genome is more than a linear code as depicted by its DNA sequences as several interacting factors play a crucial role in shaping its organization and function The complete sequences of a number of plant genomes and the recent advances of high throughput technologies has fueled research efforts in the field of Plant Nuclear Biology unveiling numerous insights about the mechanisms underlying genome regulation Genomic information is being integrated into molecular and cellular level mechanisms of the plant processes A host of nuclear processes underlie key developmental processes as well as biotic and abiotic interactions Non coding RNAs have been increasingly recognized as players in gene expression and genome defense and integrity However in vivo genomes exist as elaborate physical structures and their functional properties are strongly determined by their cellular organization Various types of subcellular structure have been identified in the nucleus which are associated with transcription factors RNA processing proteins and epigenetic regulators Interestingly these nuclear bodies display different behaviors in response to the environment This book compiles a series of landmark discussions of the recent advances in plant nuclear biology research focusing in the functional relevance of the arrangement of genomes and nuclear processes that impact plant physiology and development

Psychobiological Processes in Health and Illness Kate Hamilton-West, 2011-01-19 An accessible and engaging introduction to the interrelationships between mind and body across a broad range of topics including infectious illness autoimmunity cancer and pain Taking a biopsychosocial approach it brings together research from a number of disciplines including health psychology psychoneuroimmunology and behavioural genetics
