Cinema Expanded Jonathan Walley, 2020-07-01 Expanded cinema, avant-garde moving image works that claim new territory for the cinematic beyond the bounds of familiar filmmaking practices and the traditional theatrical exhibition space First emerging in the 1960s amidst seismic shifts in the arts, multi-screen films, live cinematic performance, light art, kinetic art, video and computer-generated imagery all placed under expanded cinema's umbrella re-emerged at the dawn of the 2000s opening a vast new horizon of possibility for the moving image and perhaps even heralding the end of cinema as we know it Cinema Expanded: Avant-Garde Film in the Age of Intermedia offers a bold new account of its subject, breaking from previous studies and from larger trends in film and art scholarship Author Jonathan Walley argues that expanded cinema's apparent departure from the traditions and forms of cinema as we know it actually radically asserts cinema's nature and artistic autonomy Walley also resituates expanded cinema within the context of avant-garde film history, linking it to a mode of filmmaking that has historically investigated and challenged the nature and limits of cinematic form As an outgrowth of this tradition, expanded cinema offered a means for

filmmakers within the avant garde regardless of their differing styles formal concerns and politics to stake out cinema's unique aesthetic terrain its ontology its independence its identity In addition to reconsidering the better known expanded cinema works of the 1960s and 70s by artists like Andy Warhol Robert Whitman and Nam June Paik Cinema Expanded also provides the first scholarly accounts of scores of lesser known works across more than 50 years Making new arguments about avant garde cinema in general and its complex meditations on the nature of cinema it urgently addresses current and crucial debates about the fate of the moving image amidst a digital age of near constant technological change

Blackness in Britain Kehinde Andrews, Lisa Amanda Palmer, 2016-04-28 Black Studies is a hugely important and yet undervalued academic field of enquiry that is marked by its disciplinary absence and omission from academic curricula in Britain There is a long and rich history of research on Blackness and Black populations in Britain However Blackness in Britain has too often been framed through the lens of racialised deficits constructed as both marginal and pathological Blackness in Britain attends to and grapples with the absence of Black Studies in Britain and the parallel crisis of Black marginality in British society It begins to map the field of Black Studies scholarship from a British context by collating new and established voices from scholars writing about Blackness in Britain Split into five parts it examines Black studies and the challenge of the Black British intellectual Revolution resistance and state violence Blackness and belonging exclusion and inequality in education experiences of Black women and the gendering of Blackness in Britain This interdisciplinary collection represents a landmark in building Black Studies in British academia presenting key debates about Black experiences in relation to Britain Black Europe and the wider Black diaspora With contributions from across various disciplines including sociology human geography medical sociology cultural studies education studies post colonial English literature history and criminology the book will be essential reading

for scholars and students of the multi and inter disciplinary area of Black Studies

Visions of England Paul

Dave,2006-03-01 Visions of England is a provocative and original exploration of Englishness in particular English class in contemporary cinema Class has been a central part whether consciously or not of much of English social analysis and artistic production for over a century But as a way of interpreting society class has found itself sidelined in a postmodern world Visions of England presents a detailed analysis of the changing landscape of English class and culture Visions of England explores a wide range of film production from gangster thrillers like Lock Stock Two Smoking Barrels to the period cinema of Elizabeth from cult classics like Performance and Trainspotting to the mainstream romantic comedy of Notting Hill and Bridget Jones from the social realist drama of Billy Elliot and The Full Monty to the multicultural comedy of Bend it like Beckham and the experimentalism of films such as London Orbital and Robinson in Space An extraordinarily wide ranging and incisive study Visions of England rewrites the relationship of film and Englishness

Marine Pilotage Great Britain:

Parliament: House of Commons: Transport Committee,2013-03-07 This report questions whether the Department for Transport is striking the appropriate balance between its role as a regulator of port safety and its aim to promote the commercial attractiveness of UK ports This follows evidence that most ports fail to confirm to Government that they comply with best practice guidance on port safety and the Maritime and Coastguard Agency has the resources to conduct just four port health checks each year Representatives of marine pilots who guide ships in and out of ports lack confidence that the Department for Transport understands their concerns and the requirements of their work and shares their aim of enhancing maritime safety The Committee is opposed to a proposal supported by Government to relax the rules on the granting of pilotage exemption certificates to more junior navigating officers which could jeopardise safety If the Government insists on pressing ahead with this change the Committee recommends that the impact of the change should be monitored Other recommendations include that the Maritime and Coastguard Agency should broaden its safety inspection programme so that it undertakes eight inspections per annum ports should be required to publish statistics on accidents and near misses the Government should use its influence to persuade harbour authorities to accept national standards as to who can be authorised as a pilot if national standards are not adopted the case for legislation on this issue will be compelling

Awakening to China's Rise Hugo Meijer,2022-08-01 Awakening to China s Rise provides the most comprehensive analysis to date of how Europe s major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China s increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China s inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and

supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naïve and self-interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments
