

Laboratory Activity #1 — Student Laboratory Packet

Relationships and Biodiversity*A Laboratory Activity for the Living Environment***Introduction**

Botana curus is a valuable plant because it produces Curol, a compound used for treating certain kinds of cancer. Curol cannot be produced in the laboratory. *Botana curus* grows very slowly and is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Species that are more closely related to *Botana curus* are more likely to produce the important substance Curol. Three similar plant species that are plentiful (X, Y, and Z) may be related to *Botana curus*. You will work as a researcher to:

- gather structural and molecular evidence to determine which plant species is most closely related to the hypothetical species, *Botana curus*
- use this evidence to decide which plant species is most likely to serve as a source of the important substance Curol

Safety

- You will need to wear goggles while conducting Tests 4 and 5.
- Do not eat or drink anything in the laboratory while doing this laboratory activity.

Important Note: Record all of your data and answers on these laboratory sheets. You will need to keep them for review before the Regents Examination. Later, you will need to transfer your answers to a separate Student Answer Packet. Your teacher will use the packet in grading your work, and the school will retain it as evidence of your completion of the laboratory requirement for the Living Environment Regents Examination.

Structural Evidence for Relationships

Perform the following tests and record your observations in Table 1 on page 8 of this packet. Use a hand lens or microscope as needed.

Test 1-Structural Characteristics of Plants

- Do not remove the plant samples from the plastic bags/cards.
- Compare the structural characteristics of the plant samples. Record your observations in Table 1 (see page 8).

Test 2-Structural Characteristics of Seeds

- Do not remove the seed samples from the plastic bags/cards.
- Compare the structural characteristics of the seed samples. Record your observations in Table 1.

"Relationships and Biodiversity" is a laboratory activity produced by the State Education Department for use in fulfilling part of the laboratory requirement for the Regents Examination in Living Environment. Reproducing any part of this laboratory activity by other than New York State school personnel is illegal.

Ecosystems that contribute greatly to human well being through the delivery of biodiversity and ecosystem benefits should be the focus of particular concern There are key knowledge gaps on the specific nature of anthropogenic impacts species and ecosystem responses and possible management and mitigation measures Comprehensive documentation of these aspects from highly sensitive regions and ecosystems is urgently needed particularly at fine scales which is relevant for developing management and mitigation measures Pathways such as ecological restoration can offset some of the impacts but even quantifying the impacts of observed and anticipated changes is far from adequate and other mitigation measures must be considered

Biology Eric Strauss, Marylin Lisowski, 2000 **Key Topics in Conservation Biology 2** David W. Macdonald, Katherine J. Willis, 2013-02-06

Following the much acclaimed success of the first volume of Key Topics in Conservation Biology this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology Written by an internationally renowned team of authors Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume published in 2007 by exploring a further 25 cutting edge issues in modern biodiversity conservation including controversial subjects such as setting conservation priorities balancing the focus on species and ecosystems and financial mechanisms to value biodiversity and pay for its conservation Other chapters setting the framework for conservation address the sociology and philosophy of peoples relation with Nature and its impact on health and such challenging practical issues as wildlife trade and conflict between people and carnivores As a new development this second volume of Key Topics includes chapters on major ecosystems such as forests islands and both fresh and marine waters along with case studies of the conservation of major taxa plants butterflies birds and mammals A further selection of topics consider how to safeguard the future through monitoring reserve planning corridors and connectivity together with approaches to reintroduction and re wilding along with managing wildlife disease A final chapter by the editors synthesises thinking on the relationship between biodiversity conservation and human development Each topic is explored by a team of top international experts assembled to bring their own cross cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives The interdisciplinary nature of biodiversity conservation is reflected throughout the book Each essay examines the fundamental principles of the topic the methodologies involved and crucially the human dimension In this way Key Topics in Conservation Biology 2 like its sister volume Key Topics in Conservation Biology embraces issues from cutting edge ecological science to policy environmental economics governance ethics and the practical issues of implementation Key Topics in Conservation Biology 2 will like its sister volume be a valuable resource in universities and colleges government departments and conservation agencies It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects and those taking Masters degrees in any field relevant to conservation and the environment Conservation practitioners policy makers and the wider general public eager to understand more about important environmental issues will also find this book

Effects of Non-Random Sources of Alteration on Biodiversity and Ecosystem Functioning Tian Zhao,Chuanbo Guo,Chao Wang,Chunsheng Liu,Paraskevi Manolaki,2023-11-15
 Understanding how biological diversity affects ecosystem functioning is a key question in modern ecology This is of particular importance in the general context of recent global changes caused by human activities such as water abstraction flow regulation shifts in agricultural practices contamination climate changes and biological invasions These changes are affecting biodiversity ecosystem functioning and their complex interactions simultaneously However our ability to understand how genes individuals populations communities and ecosystems may respond to such changes is limited despite ecologists frequently being requested to provide policymakers and managers with predictions Indeed the species that composed biodiversity can establish complex trophic links between them in the ecosystems This structure of food webs is under the permanent constraint of community dynamics which connects species populations communities and ecosystems Therefore the response of food webs to perturbations can help ecologists to better understand the relationship between biological diversity and ecosystem functioning

The Carbon Fix Stephanie Paladino,Shirley J Fiske,2016-11-18
 Given the growing urgency to develop global responses to a changing climate The Carbon Fix examines the social and equity dimensions of putting the world s forests and necessarily the rural people who manage and depend on them at the center of climate policy efforts such as REDD intended to slow global warming The book assesses the implications of international policy approaches that focus on forests as carbon and especially forest carbon offsets for rights justice and climate governance Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance placing it into conceptual critical and historical context The book then challenges perceptions of forest carbon initiatives through in depth field based case studies assessing projects policies and procedures at various scales from informed consent to international carbon auditing While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals the authors present compelling evidence for

the complexities of the carbon offset enterprise fraught with competing interests and interpretations at multiple scales and having unanticipated and often deleterious effects on the resources and rights of the world's poorest peoples especially indigenous and rural peoples The Carbon Fix provides nuanced insights into political economic and ethical issues associated with climate change policy Its case approach and fresh perspective are critical to environmental professionals development planners and project managers and to students in upper level undergraduate and graduate courses in environmental anthropology and geography environmental and policy studies international development and indigenous studies The Software Encyclopedia ,1988 **Roach's Introductory Clinical Pharmacology** , **History of Soybeans and Soyfoods in China, in Chinese Cookbooks and Restaurants, and in Chinese Work with Soyfoods Outside China (Including Taiwan, Manchuria, Hong Kong & Tibet) (1949-2022)** William Shurtleff; Akiko Aoyagi,2022-01-11 The world's most comprehensive well documented and well illustrated book on this subject With extensive subject and geographic index 231 photographs and illustrations mostly color Free of charge in digital PDF format **Issues in Ecological Research and Application: 2011 Edition** ,2012-01-09 Issues in Ecological Research and Application 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Ecological Research and Application The editors have built Issues in Ecological Research and Application 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Ecological Research and Application in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Ecological Research and Application 2011 Edition has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> Meta-Scenario Computation for Social-Geographical Sustainability Jun Yang,Bing Xue,Xiangming Xiao,Jianhong Xia,Xinli Ke,2023-03-02
