Social Structure and Voting in the United States Robert B. Smith, 2016-03-09 This book analyzes practical and moral influences on voting decisions Undermining the widespread assumption that economic self interest is the key determinant of voting choices it discovers that moral considerations rooted in religious traditions are often the more decisive This finding is confirmed through a close analysis of tangible problems such as child neglect and crime problems which one would expect to trouble practical voters Further this book suggests that political ideologies influence party affiliation rather than the other way around It defines four categories of states in terms of human development and income equality South Heartland postindustrial and balanced It then explains why political color red purple or blue and societal problems vary across these categories Voters moral ideologies it shows combine with a state's measure of income equality and human development to shape a state's readiness to pursue practical solutions to societal problems Finally it shows that moral ideologies of the religious right and authoritarianism two very different concepts are in fact intertwined empirically This book thus suggests that education a key driver of human development anti authoritarianism and deliberative voting should begin in preschools that are both nurturant and instructive

Why Learn History (When It's Already on Your Phone) Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible but not

always reliable information Let's start with two truths about our era that are so inescapable as to have become clichés We are surrounded by more readily available information than ever before And a huge percent of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the Internet at our fingertips what's a teacher of history to do In *Why Learn History When It's Already on Your Phone* professor Sam Wineburg has the answers beginning with this We can't stick to the same old read the chapter answer the question snoozefest If we want to educate citizens who can separate fact from fake we have to equip them with new tools Historical thinking Wineburg shows has nothing to do with the ability to memorize facts Instead it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases Wineburg lays out a mine filled landscape but one that with care attention and awareness we can learn to navigate The future of the past may rest on our screens But its fate rests in our hands Praise for *Why Learn History When It's Already on Your Phone* If every K 12 teacher of history and social studies read just three chapters of this book Crazy for History Changing History One Classroom at a Time and Why Google Can't Save Us the ensuing transformation of our populace would save our democracy James W Lowen author of *Lies My Teacher Told Me* and *Teaching What Really Happened* A sobering and urgent report from the leading expert on how American history is taught in the nation's schools A bracing edifying and vital book Jill Lepore New Yorker staff writer and author of *These Truths* Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet and vice versa than any other scholar I know Anyone interested in the uses and abuses of history today has a duty to read this book Niall Ferguson senior fellow Hoover Institution and author of *The Ascent of Money* and *Civilization* **Effective**
