ABSTRACT. This theoretical study describes guidelines for writing clinical case reports in cognitive-behavioral therapy, behavior therapy and applied behavior analysis. Emphasis is laid upon the constraints to be applied in order to enhance the validity of clinical case reports. Lack of validity is a common shortcoming in clinical case reporting which limits research results interpretation and usability. A number of suggestions are made throughout the manuscript in order to strengthen single-subject designs validity. The manuscript makes the case for the contribution of clinical case reports to clinical research and empirically-based clinical practices. Guidelines for drawing up clinical case report are given. The following manuscript sections are suggested: abstract, introduction, patient identification and reason for referral, assessment strategies, clinical case formulation, treatments, study design, data analysis, effectiveness and efficiency of the intervention, and discussion. The paper provides a general and flexible framework for each of these areas. Consistency with the constraints of common clinical practices and settings is intended.

KEY WORDS. Guidelines. Single-case experiment. Case studies. Case series. Clinical case formulation. Theoretical study.

Sample Case Report Psychology:

Forensic Psychology and Neuropsychology for Criminal and Civil Cases Harold V. Hall, Joseph Poirier, 2021-11-08 Today's increasingly sophisticated psychological and neuropsychological assessments allow for a greater understanding and improved evaluations in forensic psychology. By integrating discussions of modern psychological and neuropsychological tests with extant civil and criminal cases, *Forensic Psychology and Neuropsychology for Criminal and Civil Cases* Second Edition serves as a fully updated professional resource outlining modern behavioral science's impact on the legal system. This second edition synthesizes the theoretical, empirical, and clinical literature examining it through the lens of case application. The book is divided into three parts to look at foundational, legal, ethical, and applied issues: criminal forensic evaluations and civil forensic evaluations. Chapters new to this edition address substance abuse and intoxication, interviewing and interrogation, criminal profiling, faked amnesia and recall skills, post-concussive syndrome, PCS, post-traumatic stress disorder, PTSD, and trends and research directions. Clinicians, researchers, and psychologists practicing in any number of related fields will be able to address relevant questions from both criminal forensic and civil forensic perspectives. Key features: Presents the latest advances in methodology and technology to assist forensic professionals in assessment and case formulation in the search for ground truth in applied settings; Outlines base rates for forensic areas of concern, especially helpful in evaluation report writing and courtroom testimony as an expert witness; Addresses complex criminal issues such as competency to stand trial, criminal responsibility, mitigating defenses, and violence risk. *Forensic Psychology and Neuropsychology for Criminal and Civil Cases* Second Edition is an invaluable resource to clinicians, experts, witnesses, and legal professionals; a helpful adjunct for mental health experts to formulate sound direct and cross-examination strategies and eliciting suggestions for forensically related treatment and intervention.

Critical Thinking in Psychology Robert J. Sternberg, Henry L. Roediger, Diane F. Halpern, 2007 Explores key topics in psychology showing how they can be critically examined.

Case Study Research John Gerring,2006-12-11 Case Study Research

Principles and Practices aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a case study, the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches—experimental, observational, qualitative, quantitative, ethnographic—may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.
