*The Post-Liberal Imagination* Bruce Baum, 2016-01-26 In *The Post Liberal Imagination* Bruce Baum approaches American liberalism in a critical spirit by examining the relationship between popular culture and politics The book analyzes movies television and popular music to rethink the liberal views of democracy equality racism dissent and animal rights in the Bush Obama era

**Understanding Life in the Universe** Wallace Arthur, 2022-11-17 Explores the possible nature of extraterrestrial life and how similar it may be to life on Earth

**The New Chimpanzee** Craig Stanford, 2018-03-12 The history of research into the lives of wild chimpanzees now spans more than a half century since Jane Goodall began it all The past 20 years have seen tremendous advances in our understanding of our closest kin These include revelations about our very similar genomes but also many new discoveries about social behavior and ecology New cultural traditions and forms of tool use new evidence for the causes of violence new evidence of patterns of hunting and meat eating and much more Chimpanzees are new and different apes than they were at the close of the last century *The New Chimpanzee* synthesizes the findings of the past 20 years and offers new insights and interpretations of what researchers have learned *The New Chimpanzee* draws from results of the 7 longest term 25 55 years research projects from which we've learned the most about the species augmented by other shorter field projects conducted in recent years including my own

*OECD Reviews of Risk Management Policies Illicit Trade Converging Criminal Networks* OECD, 2016-04-18 This report assesses the magnitude flows and drivers of illicit trade and the illegal economy including narcotics human trafficking wildlife sports betting counterfeit medicines alcohol and tobacco

*The Routledge Handbook of Global Development* Kearnin Sims, Nicola Banks, Susan Engel, Paul Hodge, Jonathan Makuwira, Naohiro Nakamura, Jonathan Rigg, Albert Salamanca, Pichamon Yeophantong, 2022-01-31 This Handbook provides a comprehensive analysis of some of the world's most pressing global development challenges including how they may be better understood and addressed through innovative practices and approaches to learning and teaching Featuring 61 contributions from leading and emerging academics and practitioners this multidisciplinary volume is organized into five thematic parts exploring changes in global development financing ideologies norms and partnerships interrelationships between development natural environments and inequality shifts in critical development challenges and new possibilities for positive

change Collectively the handbook demonstrates that global development challenges are becoming increasingly complex and multi faceted and are to be found in the Global North as much as the South It draws attention to structural inequality and disadvantage alongside possibilities for positive change The Handbook will serve as a valuable resource for students and scholars across multiple disciplines including Development Studies Anthropology Geography Global Studies Indigenous and Postcolonial Studies Political Science and Urban Studies The Introduction of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**Chimpanzees, War, and History** R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill

**Wild Man from Borneo** Robert Cribb, Helen Gilbert, Helen Tiffin, 2014-01-31 *Wild Man from Borneo* offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation

**Among Chimpanzees** Nancy J. Merrick, 2015-05-26 Foreword by Jane Goodall A former student and colleague of Jane Goodall shares stories of chimps and their heroes and takes readers on a journey to save man's closest relative Unbeknownst to much of the

public chimps are in trouble censuses show them to be extinct in four African countries and nearly so in ten others A large percentage of the remaining populations live in unprotected increasingly fragmented forests When Nancy Merrick learned these startling facts in 2009 she decided it was past time to discover the extent to which chimpanzees are at risk across Africa and what can be done Merrick had begun working with primates in 1972 as a young field assistant in Jane Goodall's famous Gombe camp Like the rest of the world at the time she was swept up in the excitement of discovering the remarkable world of chimpanzees their ability to fashion tools their dazzling intelligence and their complex relationships and societies From that moment on her human centered worldview shifted and she became a devoted advocate for our closest genetic relatives When Merrick returns to Africa decades later she's alarmed by how much has changed Human activity such as agriculture and logging has encroached on natural habitats throughout equatorial Africa endangering chimpanzees gorillas and bonobos In an effort to understand what we can do to save great apes Merrick connects with primatologists and conservationists who are trying to protect the last great forests Visits to some of Africa's parks sanctuaries and expanding agricultural areas reveal the urgency of the problems and the inspiration of the people leading the search for solutions Along the way Merrick demonstrates that the best hope for chimps and other great apes lies in connecting conservation to humanitarian efforts ensuring a healthy future for animals and humans alike Among Chimpanzees is at once an inspiring chronicle of Merrick's personal search to learn how chimps are faring across Africa and in captivity a crucial eyewitness account of a very critical period in their existence and a rousing call for us to join the efforts to be a voice for the chimpanzees before it's too late

**Before Humanity** Stefan Herbrechter, 2021-12-13 Before Humanity takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

**The Jane Effect** Dale Peterson, Marc Bekoff, 2015-01-19 In her nearly sixty year career as a groundbreaking primatologist and a passionate conservationist Jane Goodall has touched the hearts of millions of people The Jane Effect Celebrating Jane Goodall is a collection of testimonies by her friends and colleagues honoring her as a scientific pioneer an inspiring teacher a devoted friend and an engaging spirit whose complex personality tends to break down usual categories Jane Goodall is the celebrity who transcends celebrity The distinguished scientist who's open to nonscientific ways of seeing and thinking The human who has lived among nonhumans She is a thoughtful adult with depth and sobriety who also possesses a child's psychological immediacy and sense of wonder She is a

great scientific pioneer and yet her pioneering work goes far beyond producing advances in scientific knowledge The more than 100 original pieces included in this inspirational collection give us a sense of her amazing reach and the power of the Jane effect

**Emerald Labyrinth** Eli Greenbaum, 2017-11-07 Emerald Labyrinth is a scientist and adventurer's chronicle of years exploring the rainforests of sub Saharan Africa The richly varied habitats of the Democratic Republic of the Congo offer a wealth of animal plant chemical and medical discoveries But the country also has a deeply troubled colonial past and a complicated political present Author Eli Greenbaum is a leading expert in sub Saharan herpetology snakes lizards and frogs who brings a sense of wonder to the question of how science works in the twenty first century Along the way he comes face to face with spitting cobras silverback mountain gorillas wild elephants and the teenaged armies of AK 47 toting fighters engaged in the continent's longest running war As a bellwether of the climate and biodiversity crises now facing the planet the Congo holds the key to our planet's future Writing in the tradition of books like *The Lost City of Z* Greenbaum seeks out the creatures struggling to survive in a war torn environmentally threatened country Emerald Labyrinth is an extraordinary book about the enormous challenges and hard won satisfactions of doing science in one of the least known least hospitable places on earth

**Rewilding Our Hearts** Marc Bekoff, 2014-10-20 In wildlife conservation rewilding refers to restoring habitats and creating corridors between preserved lands to allow declining populations to rebound Marc Bekoff one of the world's leading animal experts and activists here applies rewilding to human attitudes Rewilding Our Hearts invites readers to do the essential work of becoming reenchanted with the world acting from the inside out and dissolving false boundaries to truly connect with both nature and themselves

**Ultrasocial** John M. Gowdy, 2021-08-26 Society is an ultrasocial superorganism whose requirements take precedence over individuals What does this mean for humanity's future

*Animals and Science Education* Michael P. Mueller, Deborah J. Tippins, Arthur J. Stewart, 2017-06-15 This book discusses how we can inspire today's youth to engage in challenging and productive discussions around the past present and future role of animals in science education Animals play a large role in the sciences and science education and yet they remain one of the least visible topics in the educational literature This book is intended to cultivate research topics conversations and dispositions for the ethical use of animals in science and education This book explores the vital role of animals with in science education specimens protected species and other associated issues with regards to the role of animals in science Topics explored include ethical curriculum and pedagogical dimensions involving invertebrates engineering solutions that contribute to ecosystems the experiences of animals under our care aesthetic and contemplative practices alongside science school based ethical dialogue nature study for promoting inquiry and sustainability the challenge of whether animals need to be used for science whatsoever reconceptualizing museum specimens cultivating socioscientific issues and epistemic practice cultural integrity and citizen science the care and nurturance of gender balanced curriculum choices for science education and theoretical conversations around cultivating critical thinking skills and ethical dispositions The diverse authors in this book

take on the logic of domination and symbolic violence embodied within the scientific enterprise that has systematically subjugated animals and nature and emboldened the anthropocentric and exploitative expressions for the future role of animals At a time when animals are getting excluded from classrooms too dangerous too many allergies too dirty this book is an important counterpoint Interacting with animals helps students develop empathy learn to care for living things engage with content We need more animals in the science curriculum not less David Sobel Senior Faculty Education Department Antioch University New England      **English Mechanic and World of Science** ,1888      *Light* ,1893      **English Mechanics and the World of Science** ,1887      **Lucifer** ,1888
