## Earth's Interior Layers

- The Earth is not entirely the same all the way throughout the inside of the planet. Instead, Earth is made up of distinct layers that have their own characteristics and composition. This means they are made of different materials and behave differently from one another.
- We do not know for sure what any of the layers inside of Earth look like because we have not been able to look inside but scientists studied how earthquakes moved through the Earth in order to infer what the inside of the Earth is like.
- There are two different types of crust – oceanic and continental.
  - Oceanic crust is found under the oceans. It is thinner and more dense than continental crust. This means that if it comes into contact with a continental plate, it will sink in a process called **subduction**.
  - Continental crust is found on land. It is thicker and less dense than oceanic crust. This means that if it comes into contact with an oceanic plate, it will 'over-ride' the plate and go on top of it.
- Underneath the crust is the thickest layer of the Earth's interior, the mantle. This area is solid but behaves like a liquid due to being so hot and under pressure. There are two distinct parts of the mantle.
  - The upper mantle (asthenosphere) and the lower mantle.
- The asthenosphere and crust stick together – this is called the lithosphere. When we refer to tectonic plates, we are referring to the lithosphere.
- Plate movement is caused by convection currents in the lower mantle.

In the lower mantle, rock heats up and cools down. Mass of rock is able to rise up

Jordan, 2010 Chapter by chapter help for studying and exam review with lots of support for working with the book's media resources      *A Visual Guide to Volcanoes and Earthquakes* Diana Malizia, 2017-12-15 This full color dynamically illustrated volume helps readers better understand the causes of fractures and the magnitude and violence of the forces deep within the earth. It contains shocking scenes of cities convulsed by earthquakes and volcanoes natural phenomena that in mere seconds unleash rivers of fire, destroy buildings, highways, bridges, and gas and water lines, and leave entire cities without electricity or phone service. Earthquakes near coastlands can cause tsunamis waves that spread across the ocean with the speed of an airplane. A tsunami that reaches a coast can be more destructive than the earthquake itself. All of this fierce dynamism is brought into vivid focus here with stunning photographs, cutaway diagrams, and information packed infographics      **A Guide to Documenting Learning** Silvia Rosenthal Tolisano, Janet A. Hale, 2018-01-06 A new approach to contemporary documentation and learning. What is learning? How do we look for, capture, reflect on, and share learning to foster meaningful and active engagement? *A Guide to Documenting Learning* helps educators answer these questions. Documenting learning is a process that makes thinking about learning processes visible, meaningful, shareable, and amplified. It facilitates student-driven learning, helping students reflect on and articulate their own learning processes. It also helps teachers reflect on their own learning and classroom practice. When teachers are co-creators with their students, both gain valuable insights that inform future learning and empower students as engaged learners. This unique how-to book explains the purposes and different types of documentation. Teaches different LearningFlow systems to help educators integrate documentation throughout the curriculum. Provides authentic examples of documentation in real classrooms. Is accompanied by a robust companion website where readers can find even more documentation examples and video tutorials. Written for educators of any grade level, this book provides insights into contemporary learning and professional learning environments and emphasizes the power of technology to amplify teaching and learning beyond school walls. This book touches upon information that would be useful to any school system because it scaffolds ways that educators can help students make their thinking known, which will only improve their future reasoning skills. LaQuita Outlaw, Principal, Bay Shore Middle School, Bay Shore, NY. This book will become an important guide for schools and educators to have on their shelves. The content is original, highly organized, and presents many new ideas on documenting learning. It takes what is happening in the world of teaching right now and elevates it to a coherent pedagogical process. The graphics are a fantastic resource.
